Subject: CRITICAL: Vogel discussions for FYR target completion and 2 attached letters
Attachments: Vogel - Iowa DNR's response to the Draft 5YR; Vogel Paint & Wax Company's Maurice, Iowa Superfund Site
Location: R7-RO2.2-E06-10/R7-RO

Start: 7/31/2019 8:30:00 PM
End: 7/31/2019 9:00:00 PM
Show Time As: Tentative

Importance: High

I have attached the two letters:

1. IDNR's comments on Vogel Draft FYR, and
2. Vogel's Counsel's comments on the Vogel Draft FYR.

I have incorporated comments from all Region 7 staff and HQ, but without those from the two letters above. Region 7 needs to decide on the two issues that have been objected to:

1. Institutional Control identified as "Other Findings" under Issues and Recommendations for the current draft FYR
2. Applicability of cleanup of the full groundwater plume over the entire sight v/s what has been identified in the 2000 ESD as cleanup at the property boundary.

My recommendation is:

Ex. 5 Deliberative Process (DP)

The impacts of accepting the above two recommendations on the two comments listed above will enable:

1. Completing the Vogel FYR that is currently on sharepoint for Susan's review (provided on 7/17/2019),
2. Enables Vogel to continue the Pilot Study, implement recommendations from the last FYR, provides the Region 7 information on impacts from implementation of insitu bio-remediation on the cleanup of groundwater, and
3. Responding to the two letters mentioned above.
