OK thanks.

When is EPA expecting the RTCs and will they be forwarded over for FWS to review?

Hi Supinder,

You mention a revised document is due April 2. Are you anticipating a formal response to comments prior to submittal of the revised FS?

Hi John,

Attached are comments on the draft FS report for the Rolling Knolls site which was submitted by the group on December 29, 2017. These comments incorporate input from EPA, NJDEP and FWS.

Once you have had a chance to review these comments, please let us know if you would like to set up a meeting to discuss any of them. EPA requests that a revised document be submitted by April 2, 2018.

Overall, EPA is surprised at the content and quality of this draft FS report. There are inconsistencies within the report and numerous areas that require further clarification. As you know, barring any unforeseen developments, the region currently plans to sign a Record of Decision for the site by September of this year. EPA does not want to take over revision of this document, but if the next draft is not substantially improved, we may elect to do so, in accordance with Section XII (EPA Approval of Plans and Other Submissions) of Administrative Settlement Agreement and Order on Consent for Remedial Investigation and Feasibility Study, II-CERCLA-02-2005-2034.

Please let me know if you have any questions.

Thank you,

Supinder
