Hi Tina,

See what you think of the attached. I am happy to add additional thoughts as they come to me and we work through this but this should give you a sense of things to consider.

Candi and Julie were both out today so they may also have some things to add when they are back in the office.

I asked about potential resources and it looks like we do not currently have contract money to assist with preparation of a NEPA document; however, Kelly mentioned that we may be able to assist with the preparation of documents in house.

Hope this helps and let me know if you have any questions. I am in the office until 5pm today and will be back in the office Monday morning.

Have a great weekend.

Jessica

Subject: LOOP options

Hi Jessica –

I spoke to the program yesterday and told them that we might have the option of relying on a CatEx, but that I am still waiting on info from you all to determine if it's really feasible. As I mentioned we are moving fast on this in order to present to the RA options and info on what our next steps will be.

One question came up – do you guys still have contract money to assist with preparation of NEPA docs (Rob Lawrence mentioned that years ago you all did) or have the ability to prepare something in-house? We were just curious.

Thanks,

Tina
