Yes the application is identified in a footnote as Exhibits 1-4 and 1.6, but I could not find them at the end of the ROD and were not listed in the Index up front in the ROD. It may be we use the term differently--- for EPA it is the document that the Permittee submits showing what type of facility they have or may be planning to build and all the information EPA needs to write a permit.

I think I have enough of a description from as a couple of the documents to work that the application is not that important.

So LOOP received their license in Dec. 17, 1976, amended or were issued a second License on June I, 2000. The 1994 Spill-Risk Analysis says they began operations in May of 1981, which would seem to be supported by an April 1981 Letter from Patton and Boggs saying they would start operations 2 month after they finalized the financial assurance documents.

Do these timeframes appear correct? I can set up the attorney call.

Good morning Bruce,

I believe the original applicants are referenced on page 3 of the Record of Decision (attached). I apologize if I misunderstood your inquiry. Please let me know if you are looking for something else.

I've compiled a list of agency legal contacts for the follow-up call we discussed last week. I will send you that distribution list in a few minutes. I believe EPA is going to arrange that call?

Sincerely,

Wade Morefield

Wade, I have reviewed the documents you sent me, Thanks. I did not see the original applicants or any amendatory applicants, are they available?
