Sorry, Jeff, we have a managers retreat until 4 pm. I'm free then, if you're still around.

Margaret and Darrin,

Let me know if you have about 10 minutes to talk today. I need to give you guys a heads-up on direction this may head. Also, if Steve is available that might be good. Let me know if you have a few minutes.

Jeff

I haven't been able to locate them in ICIS to confirm the section chiefs' belief that they

have not been inspected.

I'm not sure Air does, Water program might. They've operated offshore for 40 years and made some recent changes…..we're being asked about their permit status….they don't think the need a permit, but EPA and DOI attorneys may think they should have been permitted under CAA and subject to NESHAPS etc per Deepwater Port Act. We're just trying to make sure we're not blindsided with any new information or news about the facility. It would not surprise me that they've never been inspected since they think they're an OCS source not subject to EPA regulation.

Jeff,

Do you have any type of facility ID for the terminal?

Have you ever attempted to inspect or done a Section 114 request for LOOP's offshore marine oil import terminal? This facility is located in Federal waters.

Jeff Robinson, Section Chief

Air Permits Section
