A few of my nit-picky comments.

Eva,

As Eleanor mentioned, your analysis is very thorough. In the attached .doc I added some additional comments to Eleanor's version. Note that I haven't looked at the historical data with anywhere close to the detail that you have, especially information preceding my project start date of March 2017.

Doug

Eva,
I think this is a very detailed assessment, and is a good attempt to compare the Decision Tree to previous documents.

I've added a few comments to the document, using track changes. They are mostly just my thoughts, and you're free to delete them if you wish.

Let me know if you have any questions or would like to discuss.
E

As promised – just a little late. Hope we can get this to the AF before the call on Thursday. Eva

Line 68 still has this language

"Ongoing updates as field data become available. Modeling to date by the AF has not been sufficiently documented to allow an independent check on the results. The Regulatory Agencies technical team has sent a list of these deficiencies to AF."

Replace with language from line 26

Here you go!

MANY thanks to everyone for their efforts and contributions – I think we've put something together that is very strong, and should be very user-friendly (despite its size).
