Ben –

Please feel free to send to Mike to get the process going keeping in mind that Jack will only fund a portion of the work this FY. Additionally, as you may recall our discussion regarding the GIS analysis being performed by Tetra Tech, Jack and I discussed this option and we concluded that the region would do this portion of the work allowing LOE to be devoted to other tasks. So, sometime this week if available, let's revisit the sites so I can get Angel and Bob working on this ASAP.

Cheers

Hi Forrest;
We are now delayed by Jack's vacation, until July 8. In the meantime, we are putting together estimates of LOE for each project. The attached document is the last scope that I remember for the NM work. Is this still something we can work with? The budget proposed is $120k and a quick estimate of hours would be 1100. I will pass that on to Mike Paul if you approve.
Thanks!
Ben

Thanks Ben, for getting this submitted. Have you heard anything from Jacques Oliver?

Cheers

Subject: JAWRA manuscript

Hi all;
I have submitted the NM sediment manuscript to JAWRA! The manuscript ID is JAWRA-13-0151-P. As we discussed earlier, I suggested the following reviewers: Susan Cormier, Doug Drake, Tina Laidlaw, and Larry Willis. I do not know their turn-around time, but will let you know when I hear something.
At some point, we all need to fill out the attached form regarding copyrights. I will be personally responsible for my own copyrights, but you may want to assign copyrights to NMED or EPA (Box A, B, or C) – up to you.
Thanks;
Ben
