Thanks, Cindy.... That's great. All a just-in-case I guess but one never knows if we'll be asked to do more

Hi Jack!

Actually we have been looking into this. [redacted]

Hi Cindy,
Have no idea if you are spending your Sat night looking at emails. If not, is fine. If so, can you tell me what you think about this analytical method at some point? We have an 8 am Environmental Unit call tomorrow (just established it seems). I am sure others (ATSDR, CDC) would be interested I hearing what you.....or someone else?.....has to say about the method. I am guessing its the way to go but would be good to hear that from an EPA or partner agency analytical chemist. Thanks!
(PS if you don't get this, will be in touch
later.)
Jack

here is what I have and have shared with Cindy C at the lab at Ft. Meade.

I guess I will be part of your enviro unit.

NATIONAL WARN NOTICE - WIDE DISTRIBUTION

Many of you have likely seen reporting on the chemical spill in Charleston, WV which has impacted the drinking water for the American Water's treatment and distribution systems.

I received a request from American Water that they are seeking additional mobile lab support that can run samples for decision making support as they begin to take actions to clear the system.

The method and equipment specifications are attached.

Equipment - T[Ex. 4 - CBI]er GC/MS unit utilizes [Ex. 4 - CBI]. The attached files includes the protocol utilized by [Ex. 4 - CBI], the chemical producer.

Thank you.
