Hi all,

PPH is not required to be reported under TRI.

Thanks,

Rachel Felver

Good questions. Rachel, can you let us know?

Enesta,

My guess is you've already looked into this.

We know MCHC is not required to be reported under TRI. And EPA has explained what determines what is reportable under TRI.

I want to confirm that PPH is also not required to be reported under TRI. I'm checking with you because of the media interest in the West Va spill I anticipate that both of these questions may come up when the TRI report is released.

+ We continue to refer reporters to CDC and West Va's websites.
