Sorry, should have said: I agree we need to explore a joint response. And re answering the questions, if the region has been in contact w atsdr, and can help with preparing coordinated responses, that would be great, but if you need assistance getting atsdr folk, let us know. Thanks!

Agreed, and asked OCIR about that, as it appears OCIR is presently focusing only on ensuring that EPA is being responsive. Thank you!

The answer to most of the questions you pose are within CDC's authorities. They will need to opine. Also the Senator appears to be asking for a joint response. See his specific question.

Hi, Brenda. An email below says that OCIR is looking for a read tonight. Wondering if you heard back or think we should be calling folk. I am guessing no?

Hey folks - I know you all have been engaged on the West Virginia spill. See Lek's request for assistance. MK and John - I assume you will have the lead. I'll reply and give him your names. Thanks.

Lek and Bob,

Here is the email and letter. OCIR would like an ORD read tonight.

Thanks,

Subject: request from Senator Rockefeller re: study of WV chemical spill health effects

Hi David,

Senator Rockefeller's office has requested verbally and via the attached letter from the Senator, for EPA and CDC to undertake a health study to examine long-term public health risks associated with the spill. Can you please get a read from ORD folks how we would respond to this-if it is not EPA's jurisdiction?, etc.

Thank you!
