Hey Art

FYI,

See email at bottom of the chain concerning a citizen complaint in Mayfield. Also, spoke to Jason in R5. Steve Renninger should be contacting you regarding cross coordination. I know that you guys do that as a matter of routine anyway.

Let us know what you need.

Thanks. The leading edge is in the northern KY/Cincy area. Both N KY WD and Cincy are monitoring in-house and so far the results are below 20 ppb. The plume is estimated now at 86 miles in length (was 60 then 120). It has passed at least 3 of the 10 KY PWSs on the Ohio with no incidents. If we can believe the ORSANCO data from Huntington WVA (just upstream from Ashland KY), the highest value they saw was 34 ppb.

In case you are asked, here are KY's Ohio River surface water systems with the omission of the US Enrichment Plant (TNTC) downstream of Paducah.

Ohio River PWS surface water intakes:

- Ashland – River Mile 319.68 bP
- Russell – 327.7
- Maysville – 408.5
- N. KY – 462.7 (2 plants)
- Louisville – 594.65 and 600.6
- Henderson – 803.6
- Morganfield – 840.0
- Sturgis – 871.4
- Paducah – 935.6

ATSDR has come up with the drinking water screening level of 1ppm.

Our Environmental Response Team does and will be working with them today. An Incident Command Center is being set up at ORSANCO headquarters in Cincy.

Is 1 mg/L the level we should be using as a "public health" level? We are ramping up to do sampling although my water systems feel it has already passed Maysville.

Thanks again.

I've gotten an update from R3.

ORSANCO is doing downstream monitoring and modeling for any residual plume arrivals.

Do you have a contact with them?

Julie,

I don't know how many of these you may be receiving, but I thought I'd go ahead and send this to you.

Ex. 6 - Personal Privacy

Let me know how you would like to receive any future calls we get.

I've been informed by our Superfund folks that, "we have received a request from KY DEP, OSC will meet with them today to determine needs."

Please let me know if you become involved in this request for assistance.

Thanks,

Dan

Dan,

I received a call from Mr. Ex. 6 - Personal Privacy yesterday at 11:30 a.m. concerning drinking water in Mayfield, KY. He stated that he was suffering from the same symptoms as the chemical spill victims in W. Virginia; headache, nausea, diarrhea, dizziness . I'll forward the v/m to you. His # is Ex. 6 - Personal Privacy
