Thanks for handling this today. I've been standing on the sidelines unless you called me in. Looks like we're OK, right?

Hi Greg,
I sent in one comment - you are copied along with Vince and John. It would be good to have the ORD folks who have been involved take a look at the language. In the interest of time, please send comments directly to Chris and copy us in OW. Thanks!

Becki - I assume OW will respond for EPA back to ASTDR on this. Would OW like ORD comments? Let us know if we can help.

Greg

Subject: ATSDR "Short Term" Health Advisory for MCHM

All,

On behalf of Vik Kapil of ATSDR, attached is an ATSDR-revised "plain language" "short-term" HA for the chemical spill in WV. This morning, WV is reporting all samples as non-detect at a reporting limit of 10ppb. If you could please have a look at the ATSDR final draft and identify any "show stopping" edits that might need to be made prior to release, I will pass those along to ATSDR.

The attached language is to be posted on the ATSDR website within 24 hours or less.

Sorry for the short notice and thanks again.

Chris
