Flip File Placards

June 28, 2013

Terry

from Fort Worth, TX, USA Industry: Transportation Role: Owner-Operator Years In Industry: 10+ years When Purchased: In the past year Use Of Product: I will use this product

These placards save me time by being able to flip them to the proper un number and hazard class quickly. I don't have the frustration of peeling and sticking placards on my equipment then trying to peel the placards off, nor the worry of them coming off during shipment. I don't have the aggravation of shippers not having the proper placards or none at all, for the shipment. These placards are well made and easy to use. They are made for years of use if properly used. I would highly recommend these to any company or owner operator that plans to handle hazardous material shipments.

Yes, I recommend this product.
