This information is intended for use only by EPA, state, territory and tribal regulatory agencies.

nly by EPA, state, territory
agencies.

ETT Process Overview

The Drinking Water Enforcement Response Policy[1] provides a formula for scoring violations at a public water system (PWS) based on their severity and whether they have returned to compliance (RTCd) or are under a formal enforcement action. The result of that formula is the ETT Score, and if it is 11 or more that PWS becomes a priority for enforcement. Once that happens, the primacy agency is expected to lower the score through returning violations to compliance or issuing a formal, independently-enforceable action within 2 calendar quarters, with a focus towards ultimately returning all violations to compliance.

The ETT formula assigns 1, 5, or 10 points to every unaddressed (not yet under formal enforcement or RTCd) violation, based on the violation's severity. These "S" values are summed for the water system, and the age of the oldest unaddressed violation is added to that total to create the ETT score. The ERP expresses this using the formula:

$$\text{ETT Score} = \text{Sum}(S_1 + S_2 + S_3 + \ldots) + \max(n)$$

In practice, there are three overall phases in the ETT calculation:

- Finding all of the violations at water systems and determining their point totals, by:
  - Copying all the violations in the current SDWIS-Fed database from the last 5 years, based on the compliance period end date (or, for open-ended violations, the return to compliance or RTC Date), excluding any violations of unregulated contaminants.
  - Determining the severity, or tier, of the violation.
  - Checking whether the violation is eligible for implicit RTC.
  - Checking the enforcement actions table for whether the violation has RTCd or has been linked to a formal enforcement action.
  - Determining the violation's age in years, or n value, for violations that are neither RTCd nor under formal enforcement.
- Grouping those violations together by PWS, compliance period, violation code, and the drinking water rule violated; and
- Taking the sum of all those point totals plus the maximum value of n for each water system.

Which violations are included in the ETT

The ETT Score is based on violations of regulated contaminants from the past five years. Specifically, that means all violations that meet the following conditions:

- The violation is not for an unregulated contaminant (rule code 500);
- The Validity Indicator is "Y";
- The Compliance Period Begin Date is before the start of the current quarter (i.e., for the July 2015 ETT, a Compliance Period Begin Date on or before June 30, 2015);
- The Compliance Period End Date is blank (open-ended violation) or within 5 years of the start of the current quarter (i.e., for the July 2015 ETT, a Compliance Period End Date on or after July 1, 2010);
- The violation has not RTCd or it has RTCd within 5 years of the start of the current quarter; and
- The PWS is currently active.

Violation Tiers or Severity (S) values

SWTR/GWR Treatment Technique (TT) violations are Tier 1; and TCR Repeat Monitoring and Nitrate

Tier	Severity points	Description

1	10	Acute violation: Public Notice Tier 1 plus SWTR/GWR TT (Violation Code 41). The full list includes: Nitrate and/or Nitrite MCLs, Acute MRDL (Violation Code 13), TCR Acute (21), Turbidity TT (43, 44), SWTR TT (41). Note: some Tier 1 instances are not reported in SDWIS-Fed (ex: waterborne disease outbreaks, or when a system fails to test for fecal or E. coli after any positive repeat.)
2	5	Any other health-based violation (violation type MCL, MRDL or TT), plus TCR MR repeats (violation code 25 and 26) and Nitrate MR
3	1	Any other Monitoring/reporting violation or "Other" violation (such as PN or CCR)

Checking for formal enforcement and Return to Compliance (RTC) codes

Using the enforcement actions table and the violation-enforcement linking table in SDWIS-Fed, the ETT will compute RTCd Points and Formal Action Points for each violation. Initially, both RTCd Points and Formal Action Points are blank for every violation. If there is an RTC code found, RTCd Points will be set equal to S; if a formal enforcement action code is found, Formal Action Points = S.

Each violation also has an Informal Action Points column, although it does not affect the ETT score.

For a full explanation of which enforcement action codes are RTC, Formal, or Informal, see the "Enforcement Action Categories" section in the Detailed ETT Documentation. For the most part:

- RTC: SOX, EOX, SO0, EO0, and some SO6 and EO6 codes
- Formal Enforcement: SFL, EFL, SF9, EF9, SFQ, EFQ, SF&, EF&, SF%, EF%, SFR, EFR, SFW, EFW, SFV, EFV, SFM, SFO, EF-, EF=, EF<, EF/, and some SFK and EFK codes
- Informal Enforcement: any other enforcement code

Deactivated PWS: for deactivated PWS, their deactivation counts as RTC-ing all of their violations. For users of the Excel spreadsheets this will not have an effect because inactive PWS are excluded from those spreadsheets.

Implicit Return to Compliance (RTC)

The "Implicit RTC" process was built into the ETT based on the older Significant Non-Compliance (SNC) calculator. It is internal to the ETT and has no effect on the data in the SDWIS-Fed Data Warehouse. Extensive details for developers are available in the "Table Points_Auto_Removed" section of this document.

Generally, it is designed to find all TCR or SWTR/IESWTR/ESWTR violations where there were no other violations within 6 months and assume that the lack of a follow-up violation indicates that the original violation RTCd. In that case, that violation and any others that preceded it are eligible to Implicitly RTC.

When the ETT has identified a violation eligible for this Implicit RTC, it checks if the violation already has RTCd Points (in other words, if it has an explicit RTC – an RTC code in the Enforcement Actions table.) If so, the ETT does nothing. If not, the ETT sets the RTCd Points = S and Implicit RTC? = "Y".

Violation age, n

The violation age, n, is the difference, in years, between the data freeze date and the violation date for violations that are not RTCd or formally enforced. The data freeze date is the first day of the following quarter (e.g., for SDWIS 2014Q1 the data freeze date would be 4/1/2014.) The violation date is either the compliance period begin or end date depending on the type of violation:

- The violation compliance period begin date is used for:
  - SWTR TT – Violation Codes 41,42
  - IESWTR MR – Violation Code 29
  - IESWTR TT – Violation Codes 37, 47
  - IESWTR Record keeping Violation Code = 9, Contaminant Code = 0300
  - DBP TT – Violation Code 12
  - DBP MR – Violation Code 27 & Contaminant Code 0400
  - all LCR – Violation Codes 51, 52, 53, 56, 57, 58, 59, 63, 64, 66
  - all PN – Violation Codes 71, 72, 75, 76
  - Misc – Violation Codes 5, 6, 7, 8, 10
- For all other violations, the compliance period end date is used

Violation grouping

Any violations at the same water system with the same violation code, rule code, compliance period begin and end date, and status (i.e., RTCd or not; formally enforced or not) will be grouped together before the final ETT scores are computed. For example, if a system fails to monitor for the entire group of 21 Volatile Organic Contaminants, a single Severity factor of 1 would apply for the entire VOC group, instead of 21 separate Severity scores of 1 point each. This also groups violations at a PWS if violations meeting the grouping criteria are reported for multiple facilities at the PWS.

Computing the ETT scores

At this point, the ETT score itself can be computed by applying the ETT formula across all of the "violation groups" at a PWS that are neither RTCd nor formally enforced:

$$\text{ETT Score} = \text{Sum}(S_1 + S_2 + S_3 + \ldots) + \max(n)$$

Other Information about the ETT Spreadsheets

The ETT spreadsheets are available to download at: https://echo.epa.gov/sdwa_ett_reports. They are updated in the middle of January, April, July, and October. Any federal, state, or local government ETT user who would like to receive an email when the ETT and ETT Scores Tracker are updated can sign up at: https://public.govdelivery.com/accounts/USAEPAOECA/subscriber/new?topic_id=USAEPAOECA_64

Standard ETT spreadsheet

This is the original style of the ETT, which only shows data for the current quarter's ETT scores. It contains 4 worksheets of data: the PWS_List, the AllViols-PTable, the Compliance Pivot, and EnforcementTracking.

PWS_List

The PWS_List worksheet contains the ETT scores and other important information for all active public water systems that have either: (a) a current ETT score > 0, or (b) at some point in the past, had an ETT score >= 11. This limitation is imposed to reduce the total size of the data set.

Some column names to know are:

- Sys has HB viols?: Indicates "Y" if the system has had Health-based violations in the past 5 years that are not RTCd.
- PWS Type: The type of water system, which includes Community (CWS), Non-Transient Non-Community (NTNCWS), or Transient Non-Community (TNCWS).
- Pop Srvd: Population served by a water system.
- Priority Since Date: for end of the quarter when system first scored 11 or higher. This date gets reset any time the system's score drops below 11.
- Repeat violator tool: Sum of S points for all addressed, RTCd and unaddressed violations in the past 5 years, without the n time factor.
- Total RTCd Pts: Sum of all S points that have been RTCd in the past 5 years, without the n time factor.
- On Path to Compliance?: For all systems that have been on a previous quarter's list with a score greater or equal to 11, indicates if the system's prior unaddressed violations are not under enforcement or RTCd ("Not on Path" and shaded dark orange), is under formal enforcement for all prior unaddressed violations with a new score of 0 ("On Path" and shaded light yellow at bottom of list), or all violations have RTCd with a new score of 0 ("RTC" and shaded light green at bottom of list). NOTE: If some of the prior unaddressed violations have been addressed or RTCd but some violations remain unaddressed, this column will indicate "Not on Path".
- School or Childcare: In the ETT list, systems shown as "schools or childcares" are those systems that have either the code for school (SC) or daycare (DC) in the primary service area designation in SDWIS-Fed, regardless of whether they are transient or non-transient systems. Please note that the Office of Ground Water and Drinking Water's (OGWDW) use of the term "school" excludes transient systems.
- Owner Type Code: ownership of the PWS

F: Federal government
L: Local government
M: Public/Private
N: Native American
P: Private
S: State government

- Last Lead 90% result (mg/L): The most recent 90th percentile lead summary result in SDWIS-Fed within the last 5 years. Please note that PWS with populations below 3,300 are not required to report lead 90th percentile results unless they are over the 0.015 mg/L action level.
- Num Lead ALEs 5 yrs: Total number of lead action level exceedances within the last 5 years

AllViols-PTable

This Excel pivot table contains information on violation groupings from the last 5 years (both addressed and unaddressed) at all active PWS. The filters above allow users to limit the data being shown, and double-clicking on any of the values in the table will pop up a new worksheet with full data. Some important filters and data columns include:

- Violation Code: Violation code (23 indicates TCR MR violation, etc)
- Violation Type: Violation type (MCL, monitoring/reporting [MR], etc)
- Rule Name: Contaminant type (TCR, nitrates, etc)

- Compl Period Begin Date: Compliance period begin date
- Compl Period End Date: Compliance period end date
- Severity Points: Severity factor score as described in “Violation Tiers or Severity (S) values” section above
- RTCd Points: A number in this column indicates that the particular violation has been returned to compliance
- First RTC Date: The date of the first Resolving action (see Enforcement Action Categories for information on Resolving actions)
- Formal Action Points: A number in this column indicates that the particular violation has been addressed or returned to compliance
- First Formal Action Date: The date of the first Formal Enforcement Action (see Enforcement Action Categories for information on Formal Enforcement actions)
- n: Time factor as described in “Violation age, n” section above
- Violation Count: Indicates if several violations are grouped together and given one Severity factor score for the entire contaminant group. See “Violation Grouping” section above.
- Violation IDs: The violation grouping’s ID numbers. If several violations are grouped, this will be a comma-separated list
- Contaminant Codes: The violation grouping’s contaminant code values. If several violations are grouped, this will be a comma-separated list

Compliance Pivot

The data from PWS_List in Pivot Table format so that states and regions can monitor how many PWS currently have ETT scores of 0, 1-10 or >= 11. Within each of those categories, the table also shows the PWS's "On Path" status: either the PWS has never had an ETT score >= 11 ("Never Has Been >= 11"); it has previously had an ETT score >= 11 and still has not gotten its score down to zero ("Not on Path"); it has gotten its score down to zero through a combination of formal enforcement actions and returning violations to compliance ("On Path"); or it has returned all violations to compliance ("RTC").

EnforcementTracking

The EnforcementTracking Pivot Table shows the number of Formal and Informal Enforcement Actions (with the exception of enforcement sensitive actions SF9/EF9, SF&/EF&, and SFP) that are linked to violations which haven't returned to compliance (RTCd) and the number of Public Waters Systems (PWSs) affected. Double-clicking on any of the counts reveals the underlying enforcement and violation details.

Within the violation details, there is information on the enforcement actions and the violations to which these actions are linked. Enforcement actions and violations may appear more than once. "Number of Enforcement Actions" columns count the total number of distinct enforcement actions based on PWSID and Enforcement ID, while the “Number of PWS under Enforcement Actions” counts the number of distinct PWSIDs with enforcement. High values indicate that multiple enforcements have not resulted in a return to compliance (RTC). The "PivotCounter" columns should be ignored; they are there to help Excel avoid double-counting.

Specific rule and contaminant codes shown here are for general reference. For full information on federally reportable violations please see official reporting guidance.

* codes in red are required for monitoring only

Violations will add to a PWS's ETT score if they are: (1) not RTCd; (2) not addressed through formal enforcement; and (3) either have a compliance period end date within the last five years or no compliance period end date

10 points* -- Acute violations are highlighted in Purple (including Nitrates MCLs)

5 points* -- Other health-based violations (Vtype = MCL, MRDL, TT), plus TCR MR Repeats, are in Yellow. Nitrates MRs are also 5 points

1 point* -- violations include all MR and Other Vtypes

* Note that for purposes of assigning "ETT Points", the Enforcement Targeting Tool, groups violations at a PWS under the same rule, with the same compliance period begin date and end date and violation code. For example, if a system fails to monitor for the entire group of 21 Volatile Organic Contaminants, 1 point is assigned for the entire VOC group, instead of a point for each contaminant. Other examples of contaminants that could be grouped include: Stage 1 TTHM and HAA5 M/R; Radium Gross Alpha and Combined Radium MCL, IOC M/R, SOC M/R, etc. Note that this methodology will also "group" like violations that occur at multple entry points.

VCode	Violation Name	Vtype	Rule and CCode
1A	MCL, E. coli	MCL	RTCR 8000
2A	TT, Level 1 Assessment	TT	
2B	TT, Level 2 Assessment	TT	
2C	TT, Corrective/Expedited Actions	TT	
2D	Start-up Procedures Treatment Technique	TT	
3A	Monitoring, Routine	Monitoring	
3B	Monitoring, Additional Routine	Monitoring	
3C	Monitor Coliform Turbidity Trigger	Monitoring	
3D	Monitoring, Lab Cert/Method Error	Monitoring	
4A	Reporting, Assessment Forms	Reporting	
4B	Report Sample Result/Fail Monitor	Reporting	
4C	Report Startup Procedures Cert Form	Reporting	
4D	Notification, E coli Positive	Reporting	
4E	Notification, E. coli MCL	Reporting	
4F	Notify L1/L2 TT Vio, Correct Action	Reporting	
5A	Sample Siting Plan Errors	Other	
5B	Recordkeeping Violations	Other
