# ɔn of the Enforcement Targeting Tool

enforcement targeting tool is to prioritize public water systems for enforcement response. It assigns points ;ed violation at a PWS in the last 5 years, which are added to create a total score for each PWS using the ·1 + S2 + S3 + ...) + n where "S" is the severity factor for each unaddressed violation and "n" is a time e water system. The S and n factors are described below:

## = Sum of (S1 + S2 + S3 + ...) + n

### S = violation severity, generally based on Public Notice Tiers

Acute violation, Tier 1. Nitrate MCLs, Acute MRDL (VCode 13), TCR Acute (21), Turbidity TT (43,44), SWTR TT (41). Note: some Tier 1 instances are not reported in SDWISFED (ex: waterborne disease outbreaks, or when a system fails to test for fecal or e. coli after any positive repeat)

Other health-based violation, Tier 2. (Vtype=MCL, MRDL, TT) Also, TCR MR Repeats (Vcode 25 and 26) and Nitrate MRs
Monitoring/reporting violation, or any other violation, Tier 3 (such as PN, CCR, etc)

### n = maximum number of years since the system's oldest unaddressed violation

**n = (current calendar year) minus (compliance period begin or end date)**

**(For example, if the PWS's oldest unaddressed violation in the past five years occurred in the current calendar year, an n factor of 0 is assigned. If it occurred two years prior, an n factor of 2 is assigned)**

**Violations where compliance period begin date is used: See codes worksheet for details**

SWTR TT - VCodes 41,42
IESWTR MR - VCode 29. TT - VCodes 37,47. Record keeping VCode = 9, CCode = 0300
DBP TT - VCode 12. MR - VCode 27 & CCode 0400
all LCR - VCodes 51,52,53,56,57,58,59,63,64,66
all PN - VCodes 71,72,75,76
Misc - VCodes 5,6,7,8,10

**For all other violations, the compliance period end date is used**

### Return to Compliance Note

This calculator includes an Implicit Return to Compliance Tool. It is similar to the process that was included in SNC calculator that implicitly addresses certain violations if no additional violations of the same type occur at the PWS in the subsequent 6 months. The new RTC tool addresses all applicable violations by rule for the rules listed below. Violations that are implicitly RTCd with this tool are not included in the score for the PWS.

**It addresses the following violation codes for TCR, SWTR and IESWTR:**

All TCR violation codes: 21,22,23,24,25,26
SWTR violation codes 31 and 36 MR, and Code 41 TT (see Codes worksheet for details)
IESWTR violation code 38 MR

These violation codes are implicitly addressed if there hasn't been a subsequent violation, by rule, for more than 6 months.

**Violation Addressing:**

**Grouping:**

## ıformation

most recent quarterly frozen SDWISFED database. The violation data includes federally-regulated contaminant violations that occurred in the last 5 years at all systems (including PWS with no violations and inactive PWS).
The PWS score includes only violations that have not received an 'addressing' enforcement action, including resolving actions such as return to compliance.
* Violations are considered RTC'd with the earliest SOX, EOX, SO0 or EO0 enforcement action, or on the date the PWS closes, if the state reports a deactivation date. Also counted as RTCing are enforcement action type SO6 and EO6 for violation codes: 9, 12, 29, 37, 56, 57, 58, 59, 63 and 64.

* Violations are addressed with the following codes: S/EF%, S/EFR, S/EFW, SFM, EF-, EF=, EF<, S/EFL, S/EFK, S/EF9, S/EFQ, S/EF&, S/EFV, S/EO0, SFO, EF/, SOX, EOX, ESX, ETX, and S/EO6 for Vcodes 9, 12, 29, 37 and for the following codes if the PWS has "tested back into compliance" and no longer has lead/copper results over the action level: 56, 57, 58, 59, 63, 64. SO6/EO6 codes also count as addressing for violation types 75 and 76 (Public Notice violations) which began before 1/1/2010.

Violations under the same rule, with the same compliance period begin and end dates and violation code, have been grouped together. For example, if a system fails to monitor for the entire group of 21 Volatile Organic Contaminants, a single Severity factor of 1 would apply for the entire VOC group, instead of 21 separate Severity scores of 1 point each. This also groups violations at a PWS if violations, meeting the grouping criteria, are reported for multiple facilities at the PWS.

## used in this Excel Workbook

| |
|---|
| The primary list of ALL active water systems with their associated scores using the ETT Score/ Sum(S)+n. |
| A pivot table that sumarizes the number of individual violations in each Region/State that are associated with each active water system. The violation details can be obtained by double-clicking on any of the summary numbers. This table includes all violations at active water systems in the last 5 years - ie both addressed and unaddressed violations. Note that violations that have a value in either the AddrPts or RTCPts columns are not included in the system's score. |
| The data from PWS_List in Pivot Table format so that states and regions can monitor how many PWS currently have ETT scores of 0, 1-10 or >= 11. Within each of those categories, the table also shows the PWS's "On Path" status: either the PWS has never had an ETT score >= 11 ("Never Has Been >= 11"); it has previously had an ETT score >= 11 and still has not gotten its score down to zero ("Not on Path"); it has gotten its score down to zero through a combination of formal enforcement actions and returning violations to compliance ("On Path"); or it has retunred all violations to compliance ("RTC"). |
| The FormalEnfTracking Pivot Table shows the number of Formal Enforcement Actions (with the exception of enforcement sensitive actions SF9/EF9 and SF&/EF&) that are linked to violations which haven't returned to compliance (RTCed) and the number of Public Waters Systems (PWSs) affected.<br>(Enforcement codes shown are:<br>'SFK','EFK','SFL','EFL','SFQ','EFQ','SF%','EF%','SFR','EFR','EFW','SFW','SFM','EF-','EF=','EF<','SFV','EFV','SFO','EF/'. By default, only EFK/SFK, EFL/SFL and SFO are shown to help with tracking BCAs and Administrative Orders.) Double-clicking on any of the counts reveals the underlying enforcement and violation details.<br>Within the violation details, there is information on the enforcement actions and the violations these actions are linked to. Enforcement actions and violations may appear more than once. "TotNumFormalEnfs" indicates how many separate Formal Enforcement Actions the violation is linked to. High values indicate that multiple formal enforcements have not resulted in a return to compliance (RTC).<br>"PivotCounterFormalEnfs" and "PivotCounterPWSs" should be ignored; they only help Excel avoid double-counting. |
| Indicates "YES" if the system has had Tier 1 violations in the past 5 years as defined by the PN Tiers(either currently addressed or unaddressed). |
| The type of water system: Community, Non-Transient Non-Community or Transient Non-Community |
| Population served by a water system. |
| Date for end of the quarter when system first scored 11 or higher. |
| Sum of S points for all addressed, RTCd and unaddressed violations in the past 5 years, without the n time factor. |
| Sum of all S points that have been RTCd in the past 5 years, without the n time factor |
| For all systems that have been on a previous quarter's list with a score greater or equal to 11, indicates if the system's prior unaddressed violations are not under enforcement or RTCd ("Not on Path" and shaded dark orange), is under formal enforcement for all prior unaddressed violations with a new score of 0 ("On Path" and shaded light yellow at bottom of list), or all violations have RTCd with a new score of 0 ("RTC" and shaded light green at bottom of list). NOTE: If some of the prior unaddressed violations have been addressed or RTCd but some violations remain unaddressed, this column will indicate "Not on Path" |
| In the Enforcement Targeting Tool (ETT) list, systems shown as "schools or childcares" are those systems that have either the code for school (SC) or daycare (DC) in the primary service area designation in SDWIS-Fed, regardless of whether they are transient or nontransient systems. Please note that OGWDW's use of the term "school" excludes transient systems. |

* codes in red are required for monitoring only

** No longer needs to be reported, only applicable until Dec 31, 2003

Violations counted in a fiscal year have a compliance period overlapping some part of that year.

10 points* -- Acute violations are highlighted in Purple (including Nitrates MCLs)

5 points* -- Other health-based violations (Vtype = MCL, MRDL, TT), plus TCR MR Repeats, are in Yellow. Nitrates MRs are also 5 points

1 point* -- violations include all MR and Other Vtypes

* Note that for puroposes of assigning "ETT Points", the Enforcement Targeting Tool, groups violations at a PWS under the same rule, with the same compliance period begin date and end date and violation code. For example, if a system fails to monitor for the entire group of 21 Volatile Organic Contaminants, 1 point is assigned for the entire VOC group, instead of a point for each contaminant. Other examples of contaminants that could be grouped include: Stage 1 TTHM and HAA5 M/R; Radium Gross Alpha and Combined Radium MCL, IOC M/R, SOC M/R, etc. Note that this methodology will also "group" like violations that occur at multple entry points.
