§ 141.859 Coliform treatment technique triggers and assessment requirements for protection against potential fecal contamination.

(a) *Treatment technique triggers.* Systems must conduct assessments in accordance with paragraph (b) of this section after exceeding treatment technique triggers in paragraphs (a)(1) and (a)(2) of this section.

(1) Level 1 treatment technique triggers.
(i) For systems taking 40 or more samples per month, the system exceeds 5.0% total coliform-positive samples for the month.
(ii) For systems taking fewer than 40 samples per month, the system has two or more total coliform-positive samples in the same month.
(iii) The system fails to take every required repeat sample after any single total coliform-positive sample.

(2) Level 2 treatment technique triggers.
(i) An *E. coli* MCL violation, as specified in § 141.860(a).
(ii) A second Level 1 trigger as defined in paragraph (a)(1) of this section, within a rolling 12-month period, unless the State has determined a likely reason that the samples that caused the first Level 1 treatment technique trigger were total coliform positive and has established that the system has corrected the problem.
(iii) For systems with approved annual monitoring, a Level 1 trigger in two consecutive years.

§ 141.859 Coliform treatment technique triggers and assessment requirements for protection against potential fecal contamination.

(a) *Treatment technique triggers.* Systems must conduct assessments in accordance with paragraph (b) of this section after exceeding treatment technique triggers in paragraphs (a)(1) and (a)(2) of this section.

(1) Level 1 treatment technique triggers.
(i) For systems taking 40 or more samples per month, the system exceeds 5.0% total coliform-positive samples for the month.
(ii) For systems taking fewer than 40 samples per month, the system has two or more total coliform-positive samples in the same month.
(iii) The system fails to take every required repeat sample after any single total coliform-positive sample.

(2) Level 2 treatment technique triggers.
(i) An *E. coli* MCL violation, as specified in § 141.860(a).
(ii) A second Level 1 trigger as defined in paragraph (a)(1) of this section, within a rolling 12-month period, unless the State has determined a likely reason that the samples that caused the first Level 1 treatment technique trigger were total coliform positive and has established that the system has corrected the problem.
(iii) For systems with approved annual monitoring, a Level 1 trigger in two consecutive years.
