Arsenic and Manganese treatment facilities.

System is currently still at 10 ug/L running annul average. They will continue to collect quarterly samples and provide sample data in their CCR's. All previous arsenic violations dating from 2007 to 2010 have been returned to compliance in SDWIS. There have been no arsenic MCL violations since 2010.	**12/28/2015**
9/23/15 - Action Plan was resubmitted. Submitting qtrly reports. ATEC has been hired to design a treatment plant. Plan is still to RTC the end of summer 2016. Should note that arsenic levels seem to be trending down, last two results were 10 and 7.1 ug/L. Based on RAA, system may no longer exceed MCL depending on 4th qtr. result. 7/2/2015 - Action Plan was submitted, District requested revisions by July 10, 2015. Based on the most recent progress report, the system is working with a vendor to scope and assemble the treatment plant, with the goal to RTC by end of summer 2016. 4/15/15 - Conversation with Jan Sweigert - CO 05-14R-002 issued on 05/30/14 and amended 10/03/14. CO imposed a RTC deadline of 7/31/2016 and required a revised corrective action plan be submitted by 11/10/14.	**12/31/2015**

2/8/16- (TW): System has awarded contract for $3.6 Mill. construction of arsenic treatment plant and storage tank. They did not use well from approximately 6/13 to 12/15. Used the well in early 2013 to pilot different media. Current RAA = 8.1 ppb. However, well only turned on to collect sample so - low sample results may be due to the well not being used and not representative of the arsenic level typically produced by the well when in use.. Construction bid awarded for $3.3 Million with construction 12-18 months. System instructed to take 1st quarter 2016 arsenic sample-if below the MCL, the system may be returned to compliance. current CO dated 5/8/12 - directs them to minimized the use of the Garzoli well in the system. 11/15/2015- (TW): System going out to bid. Estimated construction 12-18 months. This system was not selected for a revised CO due to the timeframe of RTC. It does not fluctuate much as the range is typically 11-14 ppb. They have not been using the well (2013 and 14) as they did not need it however, they recently did need to start using again due to the capacity in the system. They were using the well in early 2013 for piloting of different media. They have recent results below the MCL, however, the well was not being used in the system and only turned on to collect sample. We believe the samples below the MCL are due to the well not being used and not representative of the arsenic level typically produced by the well when in use.. 8/4/2015 (TW): Construction application has been received and waiting for the Construction FA to go out to bid. Estimated FA issued Fall 2015 with Construction 12-18 months. This system was not selected for a revised CO due to the timeframe of RTC. It does not fluctuate much as the range is typically 11-14 ppb. They have not been using the well (2013 and 14) as they did not need it however, they recently did need to start using again due to the capacity in the system. 3/7/16 RAA below MCL. Returned system to compliance in SDWIS. 11/15/2015-system is proposing to do blending. System only needs some infrastructure for blending - flowmeters and valving for regulating the blending. Submitted a permit amendment for blending. 10/15-2nd quarter arsenic not collected. System collected 3rd quarter but results not available.	**3/7/2016**

3/3/2016- DEs is positive Bella Vista has connected to Paso Robles Beach MWC. The water system needs to sign the declaration form saying they are no longer a water system and state the reason as they've connected to a permitted public water system, which should be named specifically. A letter was also sent a letter to the Paso Beach operator asking for documentation. Once we receive those documents, we will add it to the RTC list. 12/2015-Bella Vista is no longer blending, they are 100% purchasing water from Paso Beach. LPA has not seen the final contract so until they do, they don't want to inactivate the system. Kurt Souza says they are RTC because the water deal is going to happen. 6/2015-Hook up in progress to local CSA - Kurt S. advised to take of list. Until then they are blending.	**3/21/2016**
2/26/2016-In litigation - The inn's owner and his contractor have submitted sworn testimony subject to penalty of perjury in state court attesting to the fact that inn is (and has been since October) connected the city water system and disconnected from the well. 1/11/2016 - Project appears to have been completed but there is no communication from Palms Inn. 9/22/15 - Attorney General's office if overseeing compliance with the stipulated agreement. Stipulated Judgment agreed to in Sonoma County Superior Court. System must connect to City of SR by Oct 31, 2015.	**4/15/2016**

I have reported the information to Tricia Wathen. 3/10/2016: Anticipated to have the consolidation completed by 3/31/2016. They are currently in the process of laying the pipe and making the connection to the City of Hanford. The County sent the District the PO from corporate on the installation of water mains to connect to the City of Hanford. Cost is approximately $95,000 and was dated 2/23/16. once construction is completed, the water system will be inactivated and RTC. 12/1/2015-Pending Consolidation with City of Hanford. Last update was obtained in October 2015. The system currently is supplied city water for their production but their domestic line remains to be connected. 1/13/17 - Water system was returned to compliance in the 4th quarter of 2016. The new source is being tested quarterly for arsenic as its preliminary and initial arsenic tests indicate near the MCL (8-9 ug/L). *Construction application is complete and FA is in progress. Compliance order will be revised based on projected time frame for FA and construction. Awaiting response.	**11/8/2016**
6/16 - RAA is below MCL. Planning to return Richgrove back to compliance. Awaiting 2nd Q 2016 result. 4/28/16 System has 5 consecutive quarters of data on file. RAA is below MCL. 3/10/2016: Monitoring has been sporatic and will be expecting a sample result at the end of the month and the District will evaluate then. 10/15-Planning study completed. LOC issued for P84 construction funding. CSD behind on financial audits which prevent a water rate study to be completed which needed before the Prop 218 hearing can be completed.	**2/6/2017**
1/24/2017: This system was RTC in SDWIS and should be removed from the tracking spreadsheet.6/29/2016: They have continued to have difficulties with getting the blend treatment going. They are currently just using Well No. 401 and not Wells Nos. 1 and 2. However, if demands increase, then they would need to use Wells Nos. 1 and 2 (high arsenic wells) to meet demands. 5/7/2016 - KDC: Blending treatment should be operational by June 30, 2016. 3/10/2016: system will be in compliance by the end of March 2016 by either blending or using the intertie with the adjacent prision's well. 11/2/2015 - KDC: Blending treatment should be operational by Dec 31, 2015. Mechanical issues with the blend source caused delays in commencement of the blending treatment.	**10/14/2016**

The Zonneveld-Cerini Water System (CA1000627) is now RTC effective with receipt of the 7/14/16 POU data showing ND. The Zonneveld-Cedar Water System (1000369) needs one additional round of sampling (4th Q) to demonstrate 2 consecutive QRAA of compliance. **8/16/16 update:** Results are ND for each POU device. RTC estimated by end of 3rd Q 2016. Domestic water supply permit issued for POU July 2016; **6/14/2016:** Results are ND for each POU device so far. **OLD UPDATES**: 3 units have been installed and are in process of 1-year pilot study. **5/11/15 update:** 1-year pilot study completed. DO awaiting pilot study report. **7/29/15 update:** Draft pilot study report received 7/17/15 and DO comments pending. All POU devices will be installed upon DDW approval of the pilot study report, the water system will conduct required public hearing, them proceed with installation if approved by customers. Full installation anticipated to be completed by 12/31/15. RTC would be projected to occur by end of 3rd Quarter 2016. 4QRAA of wells: Well 01-32 ug/L; Well 02-21 ug/L. **9/17/15** Update: No Change **12/31/15** all POU devices installed and initial test completed. EPA Comments/Questions	RTC?	Cong. Dist.
This system does not appear to be making any progress. Recommend escallated enforcement.		CA04

Treatment selected, revised CO needed to ensure the system remains on the path to complete installation and treat the water.		CA04
EPA would like PWS to expedite final 2 POUs. Current timefram allows 18 months to complete this which seems overly generous.		CA08

Please clarify that consolidation and treatment plant construction are scheduled to complete in 2018, not just the construction of the inter-tie. RTC and construction deadlines are incongruent. Please update accordingly.		#N/A
6 months without an update. Last update stated LPA was requesting information from the PWS, the updates state that there have been no updates sinces. It is unclear if the PWS is being unresponsive.		#N/A

This, among the other LA LPA systems are concerning to EPA since very little progress appears to being made. It seems that this PWS needs to submit an application for financial assistance.		CA25

EPA is concerned that this system has not progressed considering the arsenic concentrations violate the original standard. The high arsenic is also a concern for seasonal usage.		CA04
EPA is concerned that there has been no progress for this system, and there are no interrim measures. The school declined bottled water citing that a permanent solution is in the works, however, the school has rejected all permanent solutions. The school's agrument does not seem to stand to reason. EPA recomends a revised CO with a clear and defined timeline to RTC.		#N/A
