Subject: Philadelphia AMS toxics site relocation

Hi Alice,

Hallie Weiss of Air Management Services emailed Howard, Kia, Verena and myself on 2/20/2018 about a relocation of a toxics monitoring station (SWA) located at 8200 Enterprise Ave Philadelphia, PA. Included in this email was a description of the new site location and how the new site location would meet siting criteria for trees and obstructions. The email also provided an overhead picture of the current monitoring station location and the new monitoring station location.

The site relocation will consist of moving the existing SWA site less than 400 ft. from its current position. Based on the information provided Hallie Weiss, we concur that the SWA site relocation should be approved.

Lori
