Subject: HHC Technical Workgroup Mtg #6
Attachments: national-bioaccumulation-factors-supplemental-information.pdf

Hello HHC TWG,
DEC has determined that it would be prudent to postpone our Regional approach conversation for another month so that a subgroup can convene and discuss current regional monitoring/data collection efforts.
The Regional subgroup will be meeting on February 17th. If you have specific questions/requests you would like to see this group address, please forward them to me and I will compile them accordingly.
That said, we will be discussing **Issue #3: What is the appropriate level of protection for Alaska and its residents**?

- **Issue #3a: How should DEC apply bioconcentration v. bioaccumulation factors?**
- **Issue #3b: How should DEC address concerns about its carcinogenic risk value?**

Attached is the EPA National Bioaccumulation Factors (2015). The document is 12 pages in length (not inc. references). Please consider this reading material for the February 24th meeting.
I will include all of this information in an updated meeting invitation for your convenience.
FYI: Washington State has completed their draft rulemaking on HHC and implementation tools. Information about the rule making, including documents, details about public hearings and webinar opportunities, can be found on Ecology's website at:
http://www.ecy.wa.gov/programs/wq/ruledev/wac173201A/1203ov.html
Thank you,
Brock Tabor
