Hello Ms. Rao:

This is Richard Kozuma. Sorry for not being more diligent in keeping you informed on my cesspool matter.

I still do not have approval on my shoreline certification, necessary before further planning can be done on my septic system. We ran into a major hurdle on updating and finalizing the Towill survey of my property because my troublesome neighbor filed an irrelevant subpoena for Towill's survey records, as part of the lawsuit I filed against the neighbor for harassment and loss of quiet enjoyment of my property (illegal vacation rentals and openly urinating into the ocean, for years, in full view of my wife, my visiting family members, and me). The issue on the subpoena was the erroneous thinking, on the part of my neighbor, that our common property line was more towards my property than his. Towill had done a boundary survey, as part of the survey for my septic system, and the neighbor, based on the advice of his eighth grade educated construction expert, disputed the setting of the Towill property boundary pins. The matter has now be resolved, I think, but nontheless Towill will now finish what needs to be done for obtaining our necessary shoreline certification.

Sorry this is taking so long. Given the time, and dealing with my neighbor, I have considered making major changes to my home, in conjunction with the installation of the septic system. This will not slow down my septic system installation, but may require my vacating the property until all the non-septic system changes can be made and tied into the new septic system.

Please bear with me, as I am trying to get the septic system installed as quickly as I can. I am just very uncomfortable with dealing, and continually monitoring, my cesspool. I have not had any problems with the cesspool, but I do not want any problems at all with it, except of course taking it out of use.

Regards,

Richard Kozuma
