Valois,
Would you be able to attend a project update meeting in Rapid City next Friday? We are thinking that we need to have it fairly soon if we are to have such a meeting prior to the pump tests which we plan on conducting in May.
Richard Blubaugh
Powertech (USA) Inc.

Valois,

We discussed a meeting tentatively scheduled for May 13th. Unfortunately, a number of our folks will be busy in SD on that date. Would you possibly be able to reschedule for the following week?

Richard Blubaugh

That would be fine. I will be back in the office Friday, May 23. I will also be in May 27 & 28 & June 3-6. Would Monday, May 12 afternoon work? I could ask RMC to reschedule our meeting for that morning.

Valois,

I do not know if you have a tentative agenda for the meeting scheduled for 9:30 a.m. tomorrow, so I have tentatively penciled in the following -

I.Introductions

II.Purpose

III.Roles & Responsibilities

IV.Centennial Aquifer Tests

a.Prior Tests

b.Proposed Test(s)

i. Location

ii. Schedule

V.Other

Please edit as you think appropriate and advise of any changes.

Also, would you have time after meeting with RMC to spend a little time with us reviewing a few issues for which we would like clarification? These are concepts that have been discussed but still seem to be ambiguous, e.i., area of review, aquifer exemption boundary, monitor well ring, points of compliance and bonding. Alternatively, we can agree to a different date to get together to review these items.

Please advise. Thanks.

Richard Blubaugh

Valois,

Thank you for sending the new write-up for the Area of Review, Zone of Influence and Aquifer Exemption Boundary determinations. When we agreed to meet Tuesday, I thought it might be a little ambitious. As it turns out, we
would like to have a little more time to consider the new write-up, particularly with Wallace Mays, who is out of the country until next week. I would prefer to wait until I have met with Wallace on this matter before scheduling a meeting. I should be able to get back with you in this regard Monday afternoon.

Thank you in advance for your understanding and cooperation regarding this request for postponement of the Tuesday meeting.

Richard

Hi Richard, That sounds fine to me to have the meeting on Thursday. That gives me some breathing room! I will check with Wendy Cheung and Dan Jackson (they are working on the aquifer exemption boundary definition with me) to see what times would work for them & get back to you. How many people from your office do you think will be at the meeting? Thanks!

Hi Valois,
I am assuming the time for the meeting will be 9:30 a.m., the same time as the previous meeting, at EPA's office. We are planning on bringing 5 people
(shown on attached meeting notice and tentative agenda). Please edit the agenda as appropriate for your needs. We are looking forward to discussing your proposed aquifer exemption determination proposal.

Richard Blubaugh
Powertech (USA) Inc.
Vice President - EH&S Resources

Hi Richard,
Do have any insight into whether the requirement to shut-down mining in the event of an excursion will be tied at all to our aquifer exemption boundary?
Thanks!

Valois,
We very much appreciated the opportunity to meet with you and your colleagues to review your proposal regarding the Aquifer Exemption Boundary determination. I do not have any additional insight right now. However, I have asked our attorney to provide his interpretation. I should hear from him early next week.

I will contact you with additional information when I receive it.

Again, thanks for your attention and consideration.
Richard

Richard,

I regret that it has taken so long to get comments from our counsel regarding the draft non-disclosure agreement you provided. However, attached for your review and comment is a marked up copy received from our attorney. Powertech does have some concerns regarding confidentiality that go beyond the NDA and RMC Consultants that we need to address with EPA. Dan Jackson was going to provide some guidance from their counsel. I have not yet seen the referenced guidance and will follow up with Valois regarding the guidance and our concerns.

I look forward to hearing from you after you have had an opportunity to review the attachment.

Richard Blubaugh

Powertech (USA) Inc.

303-790-7528

Valois,

Needless to say, I was unable to get back to you yesterday. We would like to schedule a meeting with you and RMC Consultants to finalize the NDA, review the data request and address your questions regarding confidentiality. Please select a couple of different times you and RMCC are available. I am not available Monday or Tuesday a.m. but am flexible for remainder of week.

Richard

Hi Richard,

I just wanted to check with you to see if you would like to have a meeting or phone call to talk about CBI issues before our meeting with RMC. I am not sure EPA has adequately addressed the CBI concerns for Powertech. I am waiting to hear back from our ethics guy (Dave Schachterle - no one can remember his real title) to get his final comments on the language we need to be sure we have in the CA. I reminded him of that today, so I hope by the end of the week I can get that to you.

Just FYI, I heard from Edgar Ethington. It sounds like we are shooting for the first 2 weeks of August for that meeting.

Thanks!

Hi Richard,

I'm sorry I never got back to you about setting up a meeting with RMC. I wanted to follow up on that now. Would the purpose of the meeting be to hand over the requested information or to further discuss the CA or both? Is there any way the information could be handed over before a meeting? Thanks!

Also, for my own edification, I put together the attached table with the info RMC requests from Powertech and whether or not it could be handled as confidential, whether as CBI or as pre-decisional until the permit application is submitted, based on my take on the regulations and our usual policy. I thought I would share it in case it was helpful.

Hi Richard, I hope you had a nice visit with your son and granddaughter. I will be home next week, cleaning house - yuk, so please feel free to call me at 303-232-2329. Here are the things on my list that I wanted to talk to you about with the attachments from previous emails all on one place:

1. The confidentiality agreement - are the changes I made OK with Powertech? Rich Valdez, RMC, said that he is willing to finalize it without his last two comments being addressed.
Here are his last 2 comments:
3) Applicable State Law - Section 4.0. If we can define what the effect of a breech is (and its consequence?), that would be beneficial to both parties as opposed to alluding to State Law. Associated with this is an interest in negotiating amicably among the parties how we settle any disputed breech. Binding arbitration by a sanctioned mediator is economically feasible and preferable.

4) Term. RMC would prefer a term limiting the duration of confidentiality be imposed. We discuss information emerging into the public domain and the limitation on that, but once we deliver our information to our client, and subsequently return all documents, I can't see any reason to continue with restrictions.

2. I also wanted to go over the list of information RMC is requesting to check on confidentiality concerns. I am not sure EPA has adequately addressed all of Powertech's CBI concerns. Here is the list of info RMC has requested with my unofficial confidentiality classifications:

3. Potential meetings: -Would you like to meet or do a conference call to discuss the information list before we all meet with RMC to hand the info over?
-A meeting with RMC to hand over requested info (or can it be done informally without a meeting?)
-Could I spend an afternoon down at KP to get a preview of the Dewey Burdock permit application before it is officially submitted to EPA? As you know, I have been working on creating permit application guidelines for Class III ISL wells over the last few months. The guideline have been taking shape as I talk with you all about different things, mainly while talking with Kaci and Patsy and addressing their questions. Between the two of them, there were a lot of really good questions! But I am just concerned that these guidelines-in-the-making were not as clear as they really needed to be for this first permit application.
Thanks!

Valois,

I must confess that I misplaced your phone number. I would like to speak with you before the Aug. 15th meeting to address some questions we have regarding RMCC's effort and recent data request as well as a few questions concerning the UIC permit process. Hopefully you can get back to me before then. Thanks.

Richard

Hi Richard,
I can't remember if we ended our call with the understanding that you would email me, or vise versa, about the info to pass along to RMC. What I was hoping we could send them is the private well data, including any logs, and any non-confidential geologic data (not exploration logs) that you or RSquared has on hand. Will that work?
Thanks!

Valois,

I believe I am to send you the email. Thanks for gentle reminder. I have had R2 compile the domestic well reports and will provide them early next week. There will be two four inch binders and the domestic well map. Additionally, we are finishing our draft narrative of the project area geology and could probably make it available next week as well. It still needs internal review.

I hope this will help satisfy the needs of RMCC.

On another note, Hal Demuth and I would like to talk to you or someone you designate regarding Class I and Class V disposal wells, preferably September
2nd or 4th. Please let me know if either of these dates work for you, or if
you have some other date available.

I regret the delay in getting back to you. It has been one of those weeks.

Enjoy the weekend.

Richard

The list of info you described sounds great.

I am working from home this week because of the Democrats convening down the street, so communication with co-workers is less direct & immediate. I have left messages about meeting with you and Hal on the 2nd or 4th to talk about a Class I or Class V well.

As for others who should attend, that depends on what you would like out of the meeting. I am eager to hear what you all would like to propose for a deep disposal well at either the Centennial or Dewey Burdock site, and that discussion could involve just Wendy Cheung & me. That could probably happen next week, once I hear back from Wendy. But if you would need a policy decision on whether or not EPA would accept a Class I vs Class V for deep disposal of ISL waste fluids, then my teamleader & Supervisor would need to be there to make the best use of your time. That would take more time to schedule. I will give you a call tomorrow to find out more about the content of the meeting you would like to have.

It looks like Wendy, Dan & I are free Tuesday Sept 2nd in the morning
after 9:00 and Tuesday afternoon after 3:00
Thursday Sept 4th from 2 to 5.

Wendy & I were thinking that Tuesday morning might be a little scarey since we are all working at home this week and Tuesday will be our first day back in the office. There is no telling what will be looming over us when we walk into our cubicles on Tuesday. But if Tuesday morning turns out the be the best time for you all, we will rise to the occasion!

Valois,

Thanks for the follow up email…good luck with the orthodontist. I have checked with Hal and John Mays and they are both available for Tuesday at 3:00, or Wednesday or Thursday. I would prefer sooner over later but will defer to your schedule. We would ask that we have at least a full hour with you. Please advise.

Thanks.

Richard

Subject: oops not Tuesday morning for me

I'm sorry - I forgot about my daughter's orthodontist appointment on Tuesday morning. It's at 9 & will be long. (She's finally getting her braces off).Wendy & I have Wednesday morning free, but Dan doesn't.

Valois,

Thank you for getting back to me on this meeting. We will likely go past 10:00 as we have a few questions related to the UIC - Class III as well.

We will plan on seeing you Wednesday at 9:00.

Enjoy your Labor Day Holiday.

Richard

I have scheduled the Big Horn Room for our meeting tomorrow morning. It is the room to the right of the sign in desk, as you are facing the desk. After I scheduled the meeting, I found out that I need to get relatives to the airport, but I will be able to join the meeting at 9:30. I am sorry for that inconvenience, but I thought that would be better than trying to reschedule the meeting. See you tomorrow morning.

Dan,

I know I am getting back to you after the fact, but I wanted to let you know
that I thought your presentation was an excellent addition to the presentations made at the GWPC. Your explanation of why uranium projects are being developed in the U.S. and around the world, as well as your description of the ISL (ISR) process was very well done. Powertech appreciates your reference to our projects and the particular focus on our Centennial Project.

The most relevant part of your paper to us, however, are the statements you made regarding EPA, Region 8's approach to permitting and monitoring relative to the proposed projects.

I regret that I did not have time to stay and visit with you after the session. However, I expect to see you again soon regarding one or both of our projects.

Respectfully,

Richard Blubaugh
Powertech (USA) Inc.

Subject: presentation for GWPC meeting

Hello Richard:

At one of our recent meetings I mentioned to you that I am scheduled to give a presentation at the upcoming Ground Water Protection Council meeting next week in Cincinnati, and I promised to send you a copy of the planned presentation and narrative, which is attached. This presentation is scheduled for Tuesday morning, so if you manage to review this and have specific comments, suggestions or concerns, please email them to me. Cheers. -dan

Hi Richard,
Thanks for copying me on your message. I didn't realize you went to GWPC. That's great, although it is a bummer that it wasn't held some place cool this time like San Diego or Annapolis, like it usually is! May I get an estimated time of arrival for the preview of geology info for the permit application & the aquifer test at Centennial when you have a moment, please?

Our very persistent consultant on the hydrologic modeling contract thoughtfully checks in with me every week, so I thought I would ask this in anticipation of his call!
Thanks!

Valois,

I am in SD today and will be back in office tomorrow. I will see that we make arrangements to get the geology to you asap. Also, I would like to get together with you to review our thoughts on the Dewey-Burdock AEB. It shouldn't take but about 30 minutes. You are welcome to visit our office, or I will gladly meet at yours?

Actually, I thought Cincinnatiwas a nice place. The hotel was near downtown and the river. Unfortunately, I had little time to enjoy it. It was my first exposure to the GWPC and I thought it was an organization we should participate in on a regular basis, particularly if they increase focus on ISL.

Richard

OK Thanks! I will be out till Oct 16, then out again until Oct 23. Would the week of Oct 27 be too long to wait to get together to talk about Dewey Burdock?

Hello Valois,

I would prefer to meet with you while you are in town, between Oct. 16 and Oct 23. It would not take long, nor would there be a lot of people, probably just two of us. We are close to finishing up the Dewey-Burdock UIC
application but would prefer to discuss a couple of items related to the AEB
prior to submitting.
Let me know.

Best regards,
Richard

OK Thanks! I will be out till Oct 16, then out again until Oct 23.
Would the week of Oct 27 be too long to wait to get together to talk about Dewey Burdock?

RE: presentation for GWPC meeting

Valois,
I am in SD today and will be back in office tomorrow. I will see that we make arrangements to get the geology to you asap. Also, I would like to get together with you to review our thoughts on the Dewey-Burdock AEB. It shouldn't take but about 30 minutes. You are welcome to visit our office, or I will gladly meet at yours?

Actually, I thought Cincinnati was a nice place. The hotel was near downtown and the river. Unfortunately, I had little time to enjoy it. It was my first exposure to the GWPC and I thought it was an organization we should participate in on a regular basis, particularly if they increase focus on ISL.

Richard

Hi Richard,
Thanks for copying me on your message. I didn't realize you went to GWPC. That's great, although it is a bummer that it wasn't held some place cool this time like San Diego or Annapolis, like it usually is! May I get an estimated time of arrival for the preview of geology info for the permit application & the aquifer test at Centennial when you have a moment, please?

Our very persistent consultant on the hydrologic modeling contract thoughtfully checks in with me every week, so I thought I would ask this in anticipation of his call!
Thanks!
