last meeting June 30th 7/29/2015

Briefing

. Risk base clean up on Intended use → Navajo = Residential
Ie forest service uses 5 15, falls (barely) within the upper Risk range

Typically ~~anything~~ a clean up number under 3 pCi/g is on the fringe.

(for Recreational uses

coordi.

	CPM
facts ≃ Background	17,300

based on the correlation factor ≃ 37,500 cpm is the DCGL / proposed action level for the Time crit.

Residential Navajo - 1.732 pCi/g (This includes background)
site wide - 2.212 / ")

300.415 (a)(2) - Requirement to locate PRPs
300.415 (g) - requirement for orderly transition from Removal to remedial
