Dear Ms. Shea,

This letter is concerning the Powertech proposal to use groundwater from the Madison aquifer, and to utilized deep well injection methods to dispose of waste associated with uranium mining.

I strongly object to both of these proposals. I urge the EPA not to permit these activities in the counties of Fall River and Custer located in the south western South Dakota.

My objections are based on the probable contamination of the Madison & Inyan Kara aquifers.

I strongly object to both of these proposals. I urge the EPA not to permit these activities in the counties of Fall River and Custer located in the south western South Dakota. My concerns are with the health and well being of the ecology of the area, the Cheyenne River and all waters downstream of the proposed injection well sites.

Please Do Not issue permits for these projects

Sincerely,

Ex. 6 Personal Privacy (PP)
