Subject: RE: Cheyenne River Sioux Tribe - Dewey-Burdock web conference Monday, October 16 2:00 pm mountain time

That sounds great! Thanks!
I will send a web conference link and conference call number by the end of this week. I will also send a draft agenda for everyone's input so we make sure we cover the topics of interest to the Tribe.

Hi Nicole,
Let's start with Monday, October 16 at 2:00 to see if that works for everyone who will be attending. That's great that David Nelson and some of his staff will attend. Would it also be possible to include the Tribal Historic Preservation Officer? Is Steve Vance still in that position? He was instrumental in educating me about the concerns of the Sioux Tribes back at the beginning of this process. It would be great to have his input, if that is possible.

I appreciate the heads-up about awareness of national conferences. I will keep that in mind when proposing future consultation sessions. Maybe we could talk about how I can make sure I keep up with those events.

I appreciate your help with scheduling!

Hi Valois,

The week of October 16 will work for the informational session. Please let me know what date works for you. Chairman Frazier will be at the National Congress of American Indians conference in Milwaukee, but the director of CRST's EPA and his team will be available anytime that week. We can talk about timelines too. If you make a proposal for dates for future consultation, then I will work with the Tribe to pin it down. With enough advance notice, barring things like national conferences, tribal officials can be available pretty much anytime.

Thanks so much,

Hi Nicole,
I apologize for taking so long to get back to you. Between figuring out my travel schedule for work and family issues, it has taken me a while to figure out what my schedule is!

How about we start with the week of Oct 16 and narrow it down to a day and time from there, depending on the schedules on your end?

There are a couple of items it would be helpful to talk through with you:

1) I envision the webinar the week of Oct 16 to be an inform and educate session, so my senior management would not necessarily be involved while I am giving the presentation. However, we would like to have the inform and educate effort go both ways, if possible. If Chairman Frazier would like our senior management to join the webinar after my presentation so they could be present for receiving information from the Tribe, I could work on making that happen. We would like to know the preference of Chairman Frazier and the Tribe so we have the right people present on our end.
2) If a portion of the inform and educate session is conducted with senior staff from the Tribe and EPA, I was hoping this webinar would be an opportunity to address the Tribe's second bullet under #2 on page 7 of the tribal consultation letter dated June 19: "*Coordinate with the Tribe before consultation begins, especially with development of an agreement on consultation timelines*" The EPA is interested in beginning that coordination effort with this webinar, if possible. With regard to the timeline for consultation, we anticipate that a number of meetings would be needed to discuss the topics the Tribe has identified in the June 19 letters.

Please give me a call if it would be helpful to discuss these items in person.
Thanks!
Valois

Hi Valois,

That is a great idea. Thank you so much for proposing it. There is indeed a lot of information. And I think a web conference would be great start. Can you give me a general time frame so that I can get our tribal representatives prepared and find out their schedules?

Thanks,

Nikki

Hello,
The administrative record for the EPA proposed actions at the Dewey-Burdock site is found at this website: https://www.epa.gov/uic/extension-public-comment-period-dewey-burdock-class-iii-and-class-v-injection-well-draft-area-0.

If you scroll about halfway down the page, you can see the documents containing all the information the EPA considered in making the proposed decisions. There are also documents that discuss where we are in processes such as tribal consultation, the environmental justice analysis and the cumulative effects analysis, where we are requesting input from Tribes and the public.

There is a lot of information there, so please give me a call if you would like to talk through the documents.

Thanks!

Valois

Dear Ms. Shea,

I received your voicemail last week. Before we begin discussing scheduling consultation, the Tribe would like to make sure that it has all of the technical reports and other materials that would be relevant to the potential impacts of the proposed project on its treaty rights, reserved water rights, and religious rights. How do you propose that we ensure that we have all of that information? We are equipped to host an electronic file transfer. Please advise. I look forward to discussing with you further.
