Subject: Re: NO - thank you for your comments

You can't be serious about even seeking exemption. Uranium is radioactive. What possible reason can you have for wanting to introduce this into our water? It's criminal. And shameful. Shame on you.

Thank you for emailing me your comments on the draft UIC Dewey-Burdock permitting actions. I have added your email to the list of public comments received. I have also added you to my contact list to keep you informed on future EPA actions related to the site.

Here is the link to the EPA UIC program website that contains all the information in the Administrative Record, in case you do not already have it:

https://www.epa.gov/uic/administrative-record-dewey-burdock-class-iii-and-class-v-injection-well-draft-area-permits

The public comment period is in effect through May 19, 2017, in case you have any additional comments after reviewing this information.

Thank you!

Valois

Subject: NO

No radioactive material must be allowed into our aquifer at any time. Ever. Radioactive material is hazardous to all life forms. This is a an abomination. NO. NO. NO.

That is my input as a member of the public.

Once again: NO.
