EFED ERB2 GENERAL
September 3, 2020

Highlights -

- RAPL –waiting on PSB clearance
- CERSA VFS workshop – next week;
- NAFTA – no work from PMRA

RR DRA/ New AIs/NU (Q4)

- Imazamox GMO— signed
- Aldicarb – had meeting with RD/BEAD/HED. Communicated ideally have PCA/PCT end of Oct. Worst case 6 months (RD asked for worst case). Also indicated that we can provide distributions for HED DEEM runs now (RD was going to check if still want that).
- Fenbuconazole, Thiram/Ziram/Ferbam and Tembotrione Q4 RR –revising based on panel, DWAs – all pass; Cycloate - Eco DRA finished; DWA – reached out to PRD on usage
- Fluometuron - moving to FY21Q1
  - DRA – sent draft to PRD; briefed them on DRA 8-19-20
  - DWA – Ex. 5 Deliberative Process (DP); working on refinement suggestions from Bill E., and explained to PRD how lack of good hydrolysis study impacting results (indicate it is stable which impact GW numbers).
- Methomyl ESA – contractor help with comments; establish next steps for team; ECOTOX run back
- Isoxaflutole cotton GMO – have off-county list; had check-in with RD – worked on outline of next steps (steps, people involved, timing)
- 2 New AIs – Ipflufen – working on ERA, had ROCKS meeting; Fluazy –working on ERA; ROCKS meeting 9-10

Projects and Committees

- EFED summer training – ending today – will do follow-up survey
- Reduce animal/RT25 SOP – FY21 planning
- UAV/Drift
  - PMRA and North America RPAAS – keeping lines of communication open
  - EFED data needs paper –EFED revised where thought appropriate (Technical questions, clarifications, but didn't get into policy/RD/label),
  - CERSA –working with steering committee working (draft goals)
    - Examine regulatory consideration of current practices and emerging UAV technology for drift mitigation
    - Examine regulatory modelling assumptions for human and environmental exposure from-manned aerial systems and emerging UAV applications
    - Assess potential regulatory data needs and/or greater understanding for the use of UAVs pesticide applications
