Re: City of Centreville
Complaint about Sanitary Sewer Discharges/Backups

Dear Mayor Jackson:

The Illinois EPA Collinsville Field Office has received several recent complaints of frequent sewage backups and sewage being discharged out of manholes near residences at 201 and 303 Park Drive in Centreville that are attributed to problems in the Centreville public sewer system. On May 31, 2017, Mr. Wayne Caughman representing the Illinois EPA discussed these complaints in detail with your Mr. Robert Whitehead, Public Works Director.

Since the operation and maintenance of the sewer system is under your jurisdiction, we request that you investigate the complaint and determine what may be causing the problem. Furthermore, we encourage you to maintain a record of all complaints that you may receive and the results of your investigations. Such a record will be useful to you in planning future sewer repairs or replacements.

Please inform this office, in writing, within fifteen (15) days of receipt of this letter, as to the results of your investigation and what steps will be taken to correct any problem found.

Should you have any questions, please contact Wayne Caughman of the Illinois EPA, Collinsville Regional Office, 2009 Mall Street, Collinsville, Illinois 62234 or telephone number 618/346-5125. We look forward to your reply.

Sincerely,

James L Miles

## Caughman, Wayne

W16 38020002

**From:** Caughman, Wayne
**Sent:** Thursday, May 24, 2018 11:40 AM
**To:** Myla Oliver-Blandford
**Subject:** RE: Cahokia Commonfields

Dennis Traiteur called and advised that one of his biggest problems he is having is with the East St. Louis collection system that he empties his sewage into from his system. Girthal Clemons, the Public Works Director there has blockage in the city lines(usually tree roots, etc.) which she was supposed to have a contractor clean out. With the blockage, flow is restricted and backs up in the Commonfields system such as you and the residents have been seeing. He was to contact her again this morning about the status of the cleanout.

**From:** Myla Oliver-Blandford [mailto:MBlandford@eshd.org]
**Sent:** Wednesday, May 23, 2018 5:43 PM
**To:** Caughman, Wayne <Wayne.Caughman@Illinois.gov>
**Subject:** [External] Cahokia Commonfields

Hi Wayne,

In summary for today, with regard to the ongoing situation around 80th Street:
[redacted] residence: Sewage in yard [redacted] reported that there was some improvement after efforts by Cahokia Commonfields during Feb/March timeframe. She now has sewage in the yard and difficulty flushing toilets. Man hole in front of residence is seeping clear water and flooding ditches

80-82nd: Spoke with 4 residents. ¾ reported difficulty flushing toilets. Several manholes in the area with visible seeping water. Man hole on 82nd shooting water with surfactant –like foam surfacing. Underground pressure causing manhole to rise with water shooting action.

Resident on North 73rd street complained to ESHD of not being able to flush toilets/drain sinks since last week. Resident reported that Commonfields had been out 2 times last week & again on Monday with manhole in street off-filled to top with water/liquid. Resident called EHRET plumbing. Ehret's technician indicated to resident that the mainline to the houses was backed up.

Please let me know the course of action.
Thanks!

**Details of Complaint:**

A complaint was received in this office by email from Debbie Daugherty, OCRO, noting "Raw sewage being dumped into creek". Wayne Myatt with the Commonfields of Cahokia called this office and talked with Wayne Caughman of this office almost at the same time the email from Debbie Daugherty was received. Mr. Myatt briefly explained the complaint.

**Comments:**

I contacted Mr. Myatt on July 20th about the complaint. Mr. Myatt is over the sewer system in Commonfields of Cahokia. He explained that the pumps in the lift station that (b) (6) residence is tributary to were out of service. In the meantime a portable pump is used to pump the lift station wet well to the downstream manhole where the wastewater flows by gravity to the next lift station. Mr. Myatt explained that a new pump has been ordered to replace one of the pumps and the second pump had been sent out for service. The bypass pumping would take place until the repaired pump or the new pump is received and can be installed. Mr. Myatt reported that wastewater had not be pumped anywhere but to the downstream manhole.

I contacted (b) (6) about the lift station and explained the situation.

On July 29th Mr. Myatt contacted me to report that the rebuilt pump had been install and was operating properly. He went on to explain that when the new pump was received it would also be installed in the lift station.

**Contact During Visit:** Yes No ☑

**Details of Complaint:**

Complainant stated that sewage was discharging to a ditch [redacted] The problem has been occurring periodically over the past 2-3 years, with the discharge worse during and after rains. After the flow ceases, there are very obnoxious odors. The complainant stated that the sewage flow had also caused [redacted]

**Comments:**

On July 27, 2010, the writer drove to the complainant's home. Sewage was observed coming up from the ground and discharging to a ditch running northwest between [redacted] Sewage was also observed coming from the ground at the southwest corner of [redacted] See attached photographs.

A sample was collected from the ditch between the two properties at N38 degrees 35.101 minutes and W090 degrees 04.468 minutes. The results of that sampling are attached. It was noted that there was a lift station at N. 82nd and Bluff St. No problems with the station were apparent.

The writer contacted Wayne Myatt with the Common Fields of Cahokia. Mr. Myatt was aware of the problem. He stated that the Common Fields sewer system is tributary to the East St. Louis sewer system. During wet weather, the East St. Louis sewer system becomes overloaded, and Common Fields is not able to pump sewage to the East St. Louis system. He stated that this was the condition that caused the overflow reported by the complainant. East St. Louis had received 1.14 inches of rain on June 24 and 4.12 inches of rain since July 18. Mr. Myatt stated that he had been able to pump down the system and the sewage bypass had ceased the day after the complaint.

The writer contacted the complainant on August 2nd. He stated that the sewage had quit flowing the day after the inspection, but it had started again and was flowing at the same rate as was observed on the day of the inspection.

On August 4, The writer contacted Mr. Myatt and reported the condition on 82nd St. Mr. Myatt stated that the pumping to the East St. Louis sewer system was still limited.

## WATER POLLUTION CONTROL
## LOCAL COMPLAINTS

On August 6, the writer contacted East St. Louis Public Works Director Jesse Walker and left a message concerning the overflow on 82nd St. in Centreville, and asked that the sewers to which the Common Fields of Cahokia is tributary, specifically from MH 42 to MH 15, be checked for blockage. The writer asked that Mr. Walker contact the writer.

On August 19, the writer called Jesse Walker and and told him of the problems on the Commons Fields of Cahokia's sewer and asked him to have the East St. Louis sewer system downstream of the Common Fields of Cahokia connection inspected for blockage. Mr. Walker complained that Common Fields of Cahokia was withholding payment to the City for their services. He said he would have the sewers inspected, however. The writer asked that he be informed of the City's findings. Later that afternoon, Mr. Walker called to report that the line had been checked and was flowing without problem.

On September 1, during a rain event, the writer checked the lift station at 82nd and Bluff St., and the lift station at 83rd and Belleview Ave. Both lift stations appeared to be operating with no apparent probems. The writer drove by the complainant's home and observed no problems.

Records have shown that overflows on the Common Fields of Cahokia sewer system have been the result of excessive I&I on both the Common Fields of Cahokia and East St. Louis sewer systems, and lack of adequate maintenance on the East St. Louis sewer system.

**Details of Complaint:**

Complainant stated that sewage had backed up into his residence during the past weekend. Common Fields of Cahokia (CFC) was aware of the problem, but had not done anything at the time of the complaint.

**Comments:**

On March 22nd, the writer contacted CFC General Manager Dennis Traiteur. Mr. Traiteur stated that the CFC sewer system is tributary to the East St. Louis sewer system. For the past several days the East St. Louis sewer system had been overloaded, and CFC had been unable to pump to the system resulting in backups on the CFC sewer system. Mr. Traiteur stated that the level in the East St. Louis system has now dropped and that their lines are open. CFC has reactivated their lift stations, which should alleviate the backup problems on their own system.

The writer contacted the complainant and related to him what the writer had learned, and that his backup problem should shortly cease. The complainant thanked the writer.

**Details of Complaint:**

Complainant stated that sewage had backed into his residence. The problem has continued since the previous weekend of March 18-19.
The complainant had made the same complaint on March 21st. See complaint form #858.

**Comments:**

On March 23rd the writer called and left a mesaage with Common Fields of Cahokia (CFC) General Manager Dennis Traituer. Later the same day Mr. Traituer returned the call. He stated that the Bluff Ave. lift station serves the area in which the complainant's home is located. During the night this lift station had kicked out due to high head downstream of the station. This station is tributary to the Belleview Ave lift station. The Belleview Ave. station discharges to the East St. Louis sewer system. The problem at the Bluff Ave. station had been discovered on the morning of the 23rd. The station was activated, and the lines upstream were drained. Backup problems continueded at the complainant's home however. CFC investigated and found that the complainant's connection line had become plugged due to the backup on the CFC sewer system. The complainant was told to have his connection line cleared and send the bill to CFC.

On March 24, the writer contacted the complainant. He stated that the sewage backup had gone down. The complainant thanked the writer.

**Details of Complaint:**

The complainant called regarding a leak in a temporary PVC pipe used to transport wastewater from one manhole to another around an inoperative lift station. The location is along Creston Drive in Belleville.

**Comments:**

This is the same individual who called earlier in the month about safety aspects of this aboveground line(Complaint #838).
On August 12, 2011, I called the general manager, Mr. Dennis Traiteur, and he advised that a small leak had been detected a day earlier and he had dispatched crews to make a repair. He was not aware of any further leaks but would send someone out. He shortly thereafter called and said no additional leaks were observed. He reiterated that he awaited a permit from IEPA to make modifications to the lift station.
Since this was the second complaint from the same individual, I drove to the site and observed the bypass line. It is marked by barricades at specified intervals, is sand bagged and securely attached on the intake and discharge sides of each manhole. The temporary run appears to be around 150 feet in length and in the middle of Creston Drive.
On the afternoon of August 12, 2011 I called the complainant and advised her of my findings.

**Details of Complaint:**

The complainant called regarding an old lift station near her residence that she was concerned about from a safety standpoint. She indicated that the lift station has been shut down for some three to four weeks and sewage was being pumped out of the top of a manhole at the lift station through a 4 inch line and transported above ground to another manhole approximately one block away. She was concerned about a lack of adequate safety barriers and features to alert vehicles and children who could have an accident playing around the site. She mentioned about sandbags being used to hold down the sewer line itself between manholes.

**Comments:**

I ended up talking to the general manager of the Commonfields of Cahokia sewage collection system, Mr. Dennis Traiteur. He was aware of the location and indicated that he was awaiting the approval of a new design in the lift station to replace parts/components that had failed. He said he would personally visit the location and add additional safety features if needed to further protect the site and people who might come into contact with the site.

RELEASABLE
MAR 29 2019
REVIEWER: MR

**Contact During Visit:** **Yes** ☐ **No** ☑

**Details of Complaint:**

The complainant stated that at two lift stations sewage was being pumped through above ground lines to manholes in the Signal Hill area. It was stated that both stations are maintained by Common Fields of Cahokia Public Water District. One of the stations was on Superior St. The other was on Creston Dr. west of 95th St.

**Comments:**

On April 28, 2011, Commonfields of Cahokia General Manager had contacted the writer to inform him that a temporary submersible pump had been installed at the Creston Dr. lift station. Mr. Traiteur described the station as a pneumatic ejector lift station. One pump was operating at diminished capacity. One pump had come back from the repair shop. A new blower was also to be installed. Electrical work was also needed on the control panel. The writer asked that Mr. Traiteur update the writer on the progress on the following Monday May 2.

On May 2, Mr. Traiteur called to report that repairs on the station were continuing.

On May 10, the writer contacted Mr. Traiteur concerning the complaint. He stated that the temporary pump at the Creston Dr. lift station was keeping up with incoming flow. He anticipated that the electrical problems would be repaired shortly, and a blower had been sent to the repair shop. Mr. Traiteur stated operating properly and they were adjusting the pulleys to obtain the right rpm.

He also stated that the shaft on one of the pumps at a lift station on Superior Dr. had been sheared. The station was having problems with a check valve. Both pumps were out of service, but a new pump was to be installed that day, and repairs made by the end of the week.

On May 17, Mr. Traiteur called to give an update. He stated that at the Superior Dr. L.S. one pump was operational as well as the check valve. The rotating assembly for the second pump was being repaired.

At the Creston Dr. L.S., a new motor and starter had been installed along with new wiring. The pulleys had been changed. New power leads were to be installed that day on pump #1. #880

**Details of Complaint:**

The complainant submitted an Illinois Incident Report to the Agency(Attachment1) which discussed briefly an incident of raw sewage standing in the street "---for the last 2 1/2 days".
This was also reported on one of the local television stations. The complainant indicated that he had contacted both local authorities and the Eastside Health District with no luck.

**Comments:**

Mr. Dennis Traiteur who is the manager of the Commonfields of Cahokia collection system which serves Centreville called on October 8th to report the incident as this was considered a sanitary sewer overflow/bypass. He indicated that the sewage discharge which went on for some 20 hours was due to blockage in the main trunk line. This then caused sewage to flow out onto the street.
He said that they had cleaned out the main line with a high pressure water jet. This allowed for normal flow again. I suggested he also clean out the area where the raw sewage had been ponding in the street which he agreed to have his crews do.
The official sanitary sewer overflow or bypass report regarding this discharge was sent to the Agency on October 13, 2012.

**Details of Complaint:**

Complainant is a resident of Centreville complaining about sewage being pumped to a ditch from the lift station on 37th and Market Street. This lift station contains pumps that transfer this sewage to the City of East St. Louis sewage collection system, tributary to the American Bottoms Regional WWTF. [redacted] stated that the City is working on repairing the pumps, but that the sewage was being discharged to a ditch. [redacted] complained about the raw sewage in the ditch and odor from the sewage.

**Comments:**

I contacted the City of Centreville about [redacted] complaint. They stated that they would investigate the complaint and work on repairing the lift station. The complainant sent me pictures of the lift station, where raw sewage was being pumped. I told him that a Sanitary Sewer Overflow (SSO) Report needs to be sent by the City to the IEPA. I also told him that a 24-hour notification needs to be sent to the Agency prior to an SSO Event. I ComplaintInquiry Letter will be sent to the City of Centreville concerning this complaint.

**DESCRIPTION OF VIOLATION(S): i.e., Effluent, SSO, CAFO, Spill, SW, Unpermitted Discharge, etc.)**

Commonfields of Cahokia Public Water District operates both a water and wastewater collection system in St. Clair County. The wastewater service area is approximately 5.5 square miles in size and includes over 43 miles of sewer line and 28 pumping stations. Areas served include a small part of west Belleville, a small area of Cahokia and a portion of Centreville and Alorton. Sanitary sewer overflows and bypasses as well as complaints occurred with regularity in 2012 and 2013.
Details from an Agency visit and inspection made on April 3 and April 17, 2013 are shown attached.

# Sanitary Sewer Overflow or Bypass Notification Summary Report

Print Form

Reset Form

- Within 24 hours of the occurrence, notify the Illinois EPA regional wastewater staff by telephone, fax, email or voice mail, if staff are unavailable.
- Within 5 days of the occurrence, provide a written report describing the overflow or bypass, including all information requested on this form. The permittee is required to submit this form or other equivalent written notification to the Illinois EPA at:

BOW/CAS - MC #19
1021 N. Grand Ave. E.
P.O. Box 19276
Springfield, IL 62794

Failure to notify the Illinois EPA as specified may result in fines up to $10,000 for each day of violation.

**nstructions:** Use this form to report all unscheduled sanitary sewer overflow or bypass occurrences. Attach additional information as necessary to explain or document the overflow or bypass. For the purpose of this report, an overflow or bypass is defined as the discharge of untreated sewage from the sanitary sewer collection system to a surface water and/or ground due to circumstances such as those identified by the check boxes in the overflow or bypass details section of this form.

**Use one form per occurrence.** A single occurrence may be more than one day if the circumstance causing the overflow or bypass results in a discharge duration of more than 24-hours. If there is a stop and restart of the overflow or bypass within 24-hours, but it's caused by the same circumstances, report it as one occurrence. If the discharges are separated by more than 24 hours, they should be reported as separate occurrences.

**24 - Hour Notification Information**

Permittee (Municipality or Facility Name): Commonfields of Cahokia Public Water District

Permit Number: N/A

Person Representing Permittee Who Contacted IEPA: Dennis Traiteur

**Overflow or Bypass Reported to IEPA**

Date: 5/8/13

Time: 1:30 AM [ ] PM [X]

IEPA Office and Person Contacted: Wayne Caughman Collinsville

**Sanitary Sewer Overflow or Bypass Details**

Date and Duration of Overflow or Bypass Occurrence (complete a separate form for each occurrence):

Start Date: 5/8/13

Time: 9:00 AM [X] PM [ ]

Duration of the overflow or bypass (hours and minutes): Ongoing Overflow

Estimated Volume of Wastewater Discharged (gallons):

WWTP Flow During bypass (report in MGD): Not applicable for a collection system SSO. N/A

Location of the Overflow or Bypass: 219 N. 82nd St., Centreville, IL

Circumstances Causing the Overflow or Bypass (check all that apply)

[X] Rain [ ] Power Outage [ ] Equipment Failure [ ] Other (explain below)
[ ] Snow Melt [ ] Broken Sewer [ ] Widespread Flooding

Provide a narrative description to further explain why the overflow or bypass occurred. For example, describe what equipment failed, what caused the power outage, or what plugged the sewer. Flooding should only be indicated, as a cause if there is significant flooding that is caused by high river, stream, or lake water levels, not just localized high water in the street.

City of East St. Louis Sewer System full. Not accepting Commonfields of Cahokia Public Water District discharge.

**Wet Weather (if applicable)**

Date(s) and Duration of Rainfall:

| Start Date: | Time: | AM PM | End Date: | Time: | AM PM | Amount of Rainfall (inches) | Amount of Snow Melt (inches) |
|---|---|---|---|---|---|---|---|
| | | ☐ ☐ | | | ☐ ☐ | | |

Contributing Soil Conditions (saturated, frozen, soil type)

**Where Did the Dischrge from the Overflow or Bypass Go? (check all that apply)**

Provide the name of the local receiving water that the wastewater enters, which could be a nearby stream, river, lake, or wetland. If discharge does not enter directly into surface water, but indirectly by way of a ditch or storm sewer, trace the path of the ditch or storm sewer to find the receiving water.

- [X] Runs on ground and absorbs into the soil
- [ ] Ditch, Name of surface water it drains to:
- [ ] Storm Sewer, Name of surface water it drains to:
- [ ] Surface water direct discharge:
- [ ] Basement Back-ups, (Number & use (i.e.residential, commercial) of buildings affected):
- [ ] Other, describe:

**ctions to Correct This Occurrence and Prevent Future Owerflows or Bypasses**

Describe what actions were taken to minimize the volume of wastewater discharged from the overflow or bypass reported on this form. Also describe what actions are planned to prevent or minimize future overflows or bypassess. Illinois law and NPDES permits prohibit overflows or bypasses, unless certain specified conditions are met. Sanitary sewer overflows and bypasses may be the subject of enforcement action.

# WATER POLLUTION CONTROL
# LOCAL COMPLAINTS

**County / Municipality** Common Fields of Cahokia **Region** Collinsville

**Date Received** 7/26/2010 **By** Chris Port **Phone** ✓ **Letter**

**Logged In -** Yes ✓ No **Assigned To:** Chris Port

| **Complaint** | | **Complainant** | |
|---|---|---|---|
| **Against** | Common Fields of Cahokia | **Name** | [redacted] |
| **Address** | 2525 Mousette Lane | **Address** | [redacted] |
| **City** | Cahokia | **City** | [redacted] |
| **Phone** | (618) 332-6620 W | **Phone** | [redacted] |

**Contact During Visit:** Yes No ☑

**Details of Complaint:**

Complainant stated that sewage was discharging to a ditch [redacted] The problem has been occurring periodically over the past 2-3 years, with the discharge worse during and after rains. After the flow ceases, there are very obnoxious odors. The complainant stated that the sewage flow had also caused [redacted]

**Comments:**

On July 27, 2010, the writer drove to the complainant's home. Sewage was observed coming up from the ground and discharging to a ditch running northwest between [redacted] Sewage was also observed coming from the ground at the southwest corner of [redacted] See attached photographs.

A sample was collected from the ditch between the two properties at N38 degrees 35.101 minutes and W090 degrees 04.468 minutes. The results of that sampling are attached. It was noted that there was a lift station at N. 82nd and Bluff St. No problems with the station were apparent.

The writer contacted Wayne Myatt with the Common Fields of Cahokia. Mr. Myatt was aware of the problem. He stated that the Common Fields sewer system is tributary to the East St. Louis sewer system. During wet weather, the East St. Louis sewer system becomes overloaded, and Common Fields is not able to pump sewage to the East St. Louis system. He stated that this was the condition that caused the overflow reported by the complainant. East St. Louis had received 1.14 inches of rain on June 24 and 4.12 inches of rain since July 18. Mr. Myatt stated that he had been able to pump down the system and the sewage bypass had ceased the day after the complaint.

The writer contacted the complainant on August 2nd. He stated that the sewage had quit flowing the day after the inspection, but it had started again and was flowing at the same rate as was observed on the day of the inspection.

On August 4, The writer contacted Mr. Myatt and reported the condition on 82nd St. Mr. Myatt stated that the pumping to the East St. Louis sewer system was still limited.

**Action to be taken:** **Routine Investigation -** Yes ☑ No

## WATER POLLUTION CONTROL
## LOCAL COMPLAINTS

On August 6, the writer contacted East St. Louis Public Works Director Jesse Walker and left a message concerning the overflow on 82nd St. in Centreville, and asked that the sewers to which the Common Fields of Cahokia is tributary, specifically from MH 42 to MH 15, be checked for blockage. The writer asked that Mr. Walker contact the writer.

On August 19, the writer called Jesse Walker and and told him of the problems on the Commons Fields of Cahokia's sewer and asked him to have the East St. Louis sewer system downstream of the Common Fields of Cahokia connection inspected for blockage. Mr. Walker complained that Common Fields of Cahokia was withholding payment to the City for their services. He said he would have the sewers inspected, however. The writer asked that he be informed of the City's findings. Later that afternoon, Mr. Walker called to report that the line had been checked and was flowing without problem.

On September 1, during a rain event, the writer checked the lift station at 82nd and Bluff St., and the lift station at 83rd and Belleview Ave. Both lift stations appeared to be operating with no apparent probems. The writer drove by the complainant's home and observed no problems.

Records have shown that overflows on the Common Fields of Cahokia sewer system have been the result of excessive I&I on both the Common Fields of Cahokia and East St. Louis sewer systems, and lack of adequate maintenance on the East St. Louis sewer system.

**From:** Sanders, Gregg
**Sent:** Friday, August 23, 2019 3:05 PM
**To:** Stitely, Joe
**Subject:** RE: Raw sewer issues on 82nd St and Belleview Ave in Centerville Area

Joe,

I spoke with East St. Louis and Centerville: they are to locate and follow-up with me. (Commonfields of Cahokia may run close by as well.)

-Gregg

**From:** Blessman, T. James
**Sent:** Friday, August 23, 2019 12:34 PM
**To:** Stitely, Joe <Joe.Stitely@Illinois.gov>; Sanders, Gregg <Gregg.Sanders@Illinois.gov>
**Cc:** Renth, Gayle <Gayle.Renth@illinois.gov>
**Subject:** FW: Raw sewer issues on 82nd St and Belleview Ave in Centerville Area

Joe and Gregg,

There's been a recurring problem in this area primarily dealing with Wastewater but which has impacted Potable water in the area. We sent Il American out trying to locate a main break residents have been complaining about. In the course of investigating any main breaks they located these issues. They contacted me to let me know about the issues they've found in this regards.

Would you gentlemen mind looking into it? This is in the Centerville area.

**From:** Ian Rischmiller <Ian.Rischmiller@amwater.com>
**Sent:** Friday, August 23, 2019 12:06 PM
**To:** Blessman, T. James <James.T.Blessman@Illinois.gov>
**Cc:** EXT Pankiewicz, Randy <Randy.Pankiewicz@amwater.com>; Karen H Cooper <Karen.Cooper@amwater.com>; EXT Jones, Kenneth <kenneth.jones@amwater.com>
**Subject:** [External] Raw sewer issues on 82nd St and Belleview Ave in Centerville Area

The house located at [redacted] has sewage coming out of his clean out trap. The video attached is from today 08/23/2019. I also found a picture of the house on Google Maps which shows the clean out discharging to the ditch. That address was [redacted] There is another even larger sewage discharge located near [redacted] It is also flowing directly into the ditch and down the street. Can you provide an update to this issue.

Regards,

Re: City of Centreville
Complaint about Sanitary Sewer Backups

Dear Mr. Bridgewater,
We are aware of the numerous and frequent complaints due to the ongoing sewage backups in the yard of the resident at [redacted] We did respond to several complaints at this address.
We have spoken with the homeowner. Likewise, we installed a pump over a week ago and there have been no reports of problems since the installation.
Please feel free to contact me if there are any other questions/concerns regarding this matter.
Sincerely,

Marius Jackson
Mayor of Centreville
