FYI. Attached is a paper that Megan Dailer submitted for publication in Marine Pollution Bulletin. It has not yet been accepted so please do not circulate except within EPA and DOH. Title: "Algal N15 values from bioassay deployments of *Ulva* detect wastewater effluent in nearshore and offshore surface waters and produce a 3D model of the plume across the coral reef..."

Hi Wendy.

Sorry, here it is, remember that it is currently in review,

Thanks,
Meghan
