Subject: NGS-KMC Environmental Compliance Status Update - January 2014
Date: Tuesday, February 18, 2014 7:14:10 AM
Attachments: NGS-KMC Status Update-JAN 2014 Consolidated.pdf

Hello All:

I hope you had a nice Presidents' Day weekend.

By way of this email, I am transmitting to you the January 2014 status update on the Navajo Generating Station-Kayenta Mine Complex (NGS-KMC) Project. You are receiving this status update because your agency has an action to take/approval to issue with regard to this Project.

The status update is made up of three documents, which are briefly described as follows:

1. ENVIRONMENTAL COMPLIANCE STATUS UPDATE. This document is a brief narrative summary of the major accomplishments to-date in achieving environmental compliance for the Project, along with a brief summary of current/recent developments that relate to or affect the Project, followed by a general historical background summary of the NGS and KMC for context purposes. This last section will remain fairly static.
2. TABLE 1 - STATUS OF FEDERAL ACTIONS BY AGENCY. This table identifies the major Federal actions to be taken by agency, and the status of work completed/underway by agency, as applicable.
3. TABLE 2 - STATUS OF FEDERAL ACTIONS BY STATUTE/PROCESS. This table identifies the progress in achieving environmental compliance by statute (e.g., National Environmental Policy Act, Endangered Species Act, and National Historic Preservation Act), and for Tribal Consultation.

   Both Tables 1 and 2 provide somewhat more detail regarding activities underway in support of achieving environmental compliance.

My desire is that you find these documents valuable. We want to ensure this process and the compliance documents that result are useful to your needs in support of your role as a Federal agency in the Project. If you have any suggestions to improve the utility of these updates,

please feel free to let me know.

Should you have any questions concerning the intent of this email or the contents of the attached documents please do not hesitate to contact me at any time. You may also contact the Bureau of Reclamation's Sandy Eto, who is leading the environmental compliance for this Project. She may be reached at seto@usbr.gov or 623-773-6254.

Thank you,

David
