I think it would be a good idea, in part because it could be crafted as a transmittal memo from the policy level specifically in ORD to OP (this is normal)

Samantha and Jennifer,

Can we please get someone to create the "normal program-office approval memo."

The 1/8/20 memo from Paul Rey to the Administrator makes it clear that these type of reports are considered significant guidance and must be submitted to OIRA for E.O. 12866 review. We cannot post this until it has the necessary review by OIRA.

Hi Alex,

I just spoke with Bill and Mary. We'll need the document to come from ORD with the normal program-office approval memo to Caryn Muellerleile. I'm currently working with Mary to make sure that once we get the necessary OP sign-offs we are technically able to do the upload. If there are any questions, please contact Bill.

Thanks,
Melissa

In light of the fact that we are having difficulty finding someone who can upload this document into ROCIS. We should send a copy through regular email and then follow that up with a ROCIS upload as early as possible on Monday. This way folks at OMB will have more time for review.

Thanks. Have a great weekend.

All,

Great news! To address the concern raised yesterday, OMB has agreed to conduct expedited review of the PFBS toxicity assessment to help make this happen! I hate to do this to you on a Friday evening, but OMB needs this to go into ROCIS **today**. I am attaching the redline that included OCSPP's edits. I accepted edits to spacing *only* and kept all other changes in redline and made 1 editorial change to incorporate OCSPP's comment. The same change was made on pages 77 and 79.

Since we have a window of opportunity to get this across the finish line, I appreciate your help doing so. Please give me a call if you need any additional help from me to get this done.

Thank you all in advance!

Taylor, Alex and I spoke last night and you should connect with her. I was not aware of the discussion with the Administrator and I believe he did not have complete information in that discussion.

ORD will not be able to make this change and have this document go out next week. ORD's document for PFBS was considered final when the OCSPP comments were received. The type of changes OCSPP proposes would require us to go through the whole process of intra/inter-agency review and WH Technical workgroup review which will take anywhere from 6-8 months.

Happy to talk further

Subject: RE: PFAS Tox Values: OCSPP Review

Thanks for looping me in, Alex.

Yes, Tala's emails are correct. Since the Administrator has already weighed in, I assume the remaining step is to incorporate OCSPP's edits. I understand that once these changes are incorporated, the PFBS final toxicity assessment will be ready to post online.

The Administrator has a PFAS interview next Thursday. The PFAS regulatory determination should be published next week, and since this is so close to completion, I would really like us to get this tox assessment finalized before then as well, so he can highlight both actions in that interview.

This week, I have seen both a thank you note to ORD + R5 from Ohio EPA for assistance with PFAS work (Great work, ORD + R5!), as well as this InsideEPA article: https://insideepa.com/daily-news/new-jersey-dep-chief-mccabe-faults-epa-lack-pfas-class-policy

I think next week's interview is a great opportunity for the Administrator to highlight the hard work across all EPA program offices and regions addressing PFAS and would really love if we could quickly get OCSPP's edits incorporated to add this tox assessment to the list of accomplishments.

If this is not possible, please call me today to discuss why additional time is absolutely necessary.

Thanks so much!

Sam/Betsy,
As you know OCSPP Toxicologists reviewed the PFBS and GenX draft documents; our reviews/insights are attached in format appropriate for docketing (as I understand this is something the Administrator has requested).

Also attached are the documents that include OCSPP proposed in-line edits to address the OCSPP Sr Toxicologists review, specifically relative to consideration alternative UFs, to support presentation of a range of UFs (and therefore RfDs), which I also understand the Administrator requested be included.

Please let me know if you have questions.
