Subject: FW: Pipe Break at the LCP Superfund Site - Linden NJ
Date: Wednesday, January 21, 2015 3:20:00 PM

Hey John, the note below is from American Water. I'd like to give them a head's up on what they can expect during the remedy.

It would be helpful to have Gary or Carrie there as well. Would that be ok?

Thanks, jon

Good Morning Jon,

I would like to have my 2 supervisors meet you on site next week to review your project. We would also need to get the city of Linden involved and the Fire Chief. I will have Scott reach out to you next week and setup an appointment. Thanks

Subject: Pipe Break at the LCP Superfund Site - Linden NJ

Good morning Mike. I understand that the leaking water main on the LCP property has been shut off. Please let me know if your crew intends on returning to the site to make repairs or do any additional work.

As I mentioned, the LCP property is about to undergo a “remedial action,” I believe the existing pipeline could interfere with that work. Also, the site will eventually be capped, which will make access to those pipes extremely difficult. If American Water could find another location for those pipes - at least until the cap is in place - that would be ideal.

From our discussion, I understand that you've been trying to divert the water from the pipe under the LCP property to new/existing pipes on
adjacent properties. If I can be of any assistance on that effort, please
let me know.

Jon
