Jon,

We had not pursued formal access from ConRail when the Northern Off-Site ditch investigation was performed. This would be something that may need to be addressed to John Hoffman.

Thank you for the feedback on the RIR.

Subject: Quick question on Access LCP

Hi Scott, hope all is well. EPA and the Army Corps are about to begin the remedial design investigation, as part of that we'll need access to the Northern Off-Site ditch. I wasn't involved in getting access, but I believe it included taking some training for the rail road and accessing the area through Conoco Philips? Is that the case?

Most importantly, do you still have any of the contacts?

If not I'll sort it out.

Jon

Ps, when I gave the Corps and their design contractors a copy of the RI, I told them it was the best I've ever seen. We met last week and they felt the same way.
