Thanks Scott, I'll give that a shot.

Jon,

This is strange. I've tried combining Appendix H, Part II Accutest files and am not prompted for a password. Also, I didn't knowingly add a password to the most recent RI files submission. The only thing that I can think of is to try the password that I applied to the August submission which was **137005**.

Let me know if this works.

Hi Scott, our file room coordinator is trying to combine the files on the disc into one .pdf. While we can open each individual file, a request for a password pops up when trying to combine them. The problem appears to be the acutest data in Appendix H Part II.

Any idea what that's all about?

Thanks, jon

Jon and Anne,

An electronic copy on DVD-ROM of the RI Report for the LCP Chemicals Inc. Superfund Site will be sent to each of you via Federal Express for delivery on Wednesday afternoon. Please note that this version contains the full laboratory deliverables packages in Appendix H. These were too large to be transmitted in the electronic deliverable that I sent yesterday.

Please contact John Hoffman at Ashland or me if you have any questions or comments.
