Good afternoon, good seeing everyone this morning. It looks like EPA Edison approved a Brown and Caldwell QAPP in February 2011. It was revised for the off-site ditch sampling and the treatability study.

I sent ISP an approval through an e-mail in February 2011, so I guess it's technically good through Feb 2016. It will need to be revised for whatever work you perform, but since it passed the last time, perhaps it will again. Which would be nice.
