On June 14, 2017, ORA CAC staff contacted the Structural Pest Control Board and was informed the license of the hired pest control company was suspended since October 25, 2016, due to invalid insurance. On June 15, 2017, Orange County staff interviewed two teachers whose classrooms were treated, and both reported a strange odor upon their return May 22, 2017. One teacher mentioned feeling ill with a headache and the second teacher reported fatigue. It was also discovered that one female student was sent home on May 23 after she experienced symptoms of headache and nausea. On June 26, 2017 a third teacher who used one of the treated room was interviewed and she reported smelling an odor on May 22, 2017. She said there was no complaint from any of her students. Orange CAC staff continue to investigate this episode. As of July 10, ORA CAC has only been able to confirm a total of three that experienced symptoms.

Please contact me if you have any questions.
