Subject:	49-SCR-17 15-Day Report: Eight field workers developed symptoms and sought medical attention after adjacent raspberry field was treated
Date:	Friday, July 14, 2017 5:20:28 PM
Attachments:	49-SCR-17 15 Day Report.pdf

A Total of eight field workers developed symptoms and sought medical attention after an application of Pristine Fungicide, Rally 40WSP Fungicide, Dipel DF Biological Insecticide, and Widespread Max was made to an uncovered hoop-house raspberry field across a service road. Santa Cruz County Agricultural Commissioner (CAC) collected foliage samples, interviewed field workers, and is arranging to interview the applicator. Santa Cruz CAC is continuing to investigate the incident.
