Attached are the documents that you requested.

Please let me know if I misinterpreted an item; I do not compose these types of documents very often. In particular, I have little experience with composing resumes due to my lengthy stint with the government, so if my resume (CV) needs tweaking or revision, please offer advice.

Thank you,
Brad

TSCA SACC Meeting on the Agency's Draft Risk Evaluation for Asbestos.

Diana Wong previously contacted you in your interest and availability in participating in an upcoming TSCA SACC Meeting on the Agency's Draft Risk Evaluation for Asbestos (late March or late April 2020). I will be conducting the ethics review.

We need the following information to complete a confidential folder of information to conduct an ethics review and potential selection as ad hoc member of the TSCA SACC (meeting focusing on the peer review of the Agency's draft risk evaluation of asbestos):

- Please provide a completed **Confidential Financial Disclosure** form (federal government employees should submit a copy of their current 450 form – e450 and electronic signature is acceptable).

- Please answer the **four questions** concerning impartiality with respect to your involvement with asbestos (see attached table – MS Word file – this is formatted to include all four chemicals noted above).

- Please provide a **Biosketch** using the attached template (this includes two PDF pages with fillable field--save the file and submit).

- Also, send a current **CV/resume**.

- Please send responses to the **CFD-SRT@epa.gov**.

Thank you in advance for your consideration of my request.

Background Information regarding the Agency's chemical risk evaluations required by TSCA § 6(b)(2)(A).

On December 19, 2016, EPA published a list of 10 chemical substances that are the subject of the Agency's initial chemical risk evaluations, as required by TSCA § 6(b)(2)(A). The docket numbers, problem formulations, scope documents and supplemental documents for the 10 chemical substances that EPA initiated the risk evaluation process for in December 2016 can be found here:

- Pigment Violet 29 (TSCA SACC meeting, June 2019)
- 1, 4 Dioxane (TSCA SACC meeting, July 29-Aug 2, 2019)
- Cyclic Aliphatic Bromide Cluster (HBCD) (TSCA SACC meeting, July 29-Aug 2, 2019)
- 1-Bromopropane (TSCA SACC Meeting, Sept 10-12 2019)
- Methylene Chloride (TSCA SACC Meeting, Dec 2019)
- N-Methylpyrrolidone (TSCA SACC Meeting, Dec 2019)

- Carbon Tetrachloride – TSCA SACC Meeting announced for Feb 25-26, 2020
- Perchloroethylene TBD
- Trichloroethylene TBD
- Asbestos - TBD

The TSCA SACC has previously met to review the Agency's draft risk evaluations for: Pigment Violet 29, 1,4 Dioxane, Cyclic Aliphatic Bromide Cluster (HBCD), 1-bromopropane, methylene chloride, and N-Methyl-2-pyrrolidone (NMP). Four chemicals remain: perchloroethylene, trichloroethylene, carbon tetrachloride, and asbestos. The carbon tetrachloride meeting is February 25-26, 2020.

This leaves meetings tentatively scheduled for March and April for the remaining three chemicals: perchloroethylene, trichloroethylene, and asbestos. Diana Wong has solicited your interest in participating in the TSCA SACC meeting focusing on asbestos.

Please don't hesitate to follow-up with questions.

Best regards,

Sharlene
