Mike Eisele 3/24/16

- Yesterday talked to Jill Inahara about test plan questions
- Talked to Bullseye yesterday about batch
  - recipe w/ mostchrome
  - reducing flame
    - → want largest possible emissions of CrVI
  - normally
- 1-1½hr test, concerns about repeatability. But costs.
- O_2 content → moisture in impingers. CO_2
- During test will measure O_2
- Had some comments on rule, not in time
- Send literature
- Paragraph on worst case, conversation w/ them.

- Timeline?
  - Bullseye test maybe as early as April 11th or 18th
- Method -
  - Method 0061 for chrome, <200°
