Brian Boling 6/3/16

→ Not low enough to be C level, but some QC data failed

Reporting limit → lowest standard of calib curve

Detection limit

MDL → .0356

RL → .181

→ Met data → April 28th → 67% < 4 mph, Coming out of NW

Manifest Station [redacted]
Next to mountain

10 new hot spots w/ FS study

In btwn BE & Daycare

Avg above benchmark 1-2 times on avg.

→ PCC

→ Not seeing spikes at PCC

PM 10 filters & can compare.

IR Microscope

→ Get truck data up to present
