Discussion with Randy Jones:

I indicated direction we were going. ie split two orders.

- he expressed a # of concerns. ie. closure plans to be submitted before standards developed.
- more palatable if defer some of penalty until work plans in 3008(h) are submitted. – I indicated we could do that.
- signing of one order (3008(a)) appears contingent upon getting an 3008(h) order developed.
- suggested we set a target date for combination 3008(a) + 3008(h). if that date is not obtained then seperate out order.
