Background on case:

This is a transitional meeting. Transfer from Bill A to Debbie.

Their atty, Randy Jones, is coming. No real reason. Has been involved since the beginning.

History (Bill)

- DEC: RCRA inspection. Many violations. Dumped stored materials (mostly product) into sump wh lead to tank → lagoon. This disposal → violations.
  Some were listed, some charac. RCRA waste.
- We looked @ SI's, sumps + tank 192 as RCRA units + Ordered closure (3008(a))
- Had trouble closing SI because of existing GW contam. (trying to clean close).
- 3008(h) Order address GW contam, SI cleanup + other corr. action.
- DEC was looking to verify allegations of other poor disposal →
  Dispose HW into pipeline
  Drums disposed into SI.
  } NOT CONFIRMED by EPA.

IMAGED

- Have addressed many things in h Order
  - RFI workplan is approved.
  - much work is done - have wells in. Doing pump + treat under consent Agrmt w/ State.

☐ Find out <u>state person</u> on recovery operation.

Mapco pre-mtg

- Last thing - submitted closure plans. need approval.
- Don't want to be identified as a permitted facil or get a PC permit. We told them the (h) Order caused delay or avoid them getting it.
- GWM wells reviewed by Tetra Tech - comments were forwarded to facility. Soil sampling - no evidence of spills. Not complicated.
- LOTS of product in the GW.
- Wells along Northern border - monitoring for migration. Nothing showed up as of last summer.
