Pororosity Distribution

The sands were assigned porosity values determined from core samples of the Miocene Sands in the Stratigraphic Test Well and particle size analysis. The Shale value was assumed based on a literature review.

Permeability Distribution

The sands were assigned a porosity value determined from core samples of the Miocene Sands in the Stratigraphic Test Well and particle size analysis. The Shale value was assumed based on a literature review.

Rock Distribution

The rock distribution was determined through a combination of well log analyses and 3D seismic data.
