Subject: RE: M/V Wild Alaskan

Betsy,
Sorry for the delay. The draft is 9 feet and the full height of the vessel is about 95 feet.
Thanks again,
Mike

Good morning,

EPA has a couple of follow up questions regarding the Wild Alaskan. Can you please provide the following information gaps:

1) the draft of the vessel.

2) "the height of the vessel from the keel to the top of the tallest mast, or rigging that will remain in place, is XXX feet".

Thank you,
Betsy

Mike,

We may have to push the schedule significantly, as the Mak Bay needs to be in DH the first week of June on another assignment.

We can discuss.

A.W.

Betsy,
Not a problem. We definitely understand. Nothing will move until we have a copy of that letter, please don't worry. If we can get the letter by the end of next week that would be wonderful. We will push our tentative movement to the week of June 7th.

Ex. 6 Personal Privacy (PP)
Could you please update our tow plan to reflect this change?

AW,
Do you see any problem with this for scheduling the Mak Bay?

v/r,
Mike

Good morning,

This is an update to let folks know that EPA's approval letter under the Marine Protection, Research and Sanctuaries Act for the scuttling of the M/V Wild Alaskan is currently being drafted. Once drafted it will be sent up the chain of command for disposal review and letter signature. The scuttling of the M/V Wild Alaskan is not approved until the letter has been issued to Mr. Tvenge.

Please be advised that within the approval letter there are notification requirements that include 1) at least 48-hour advance notice of intent to dispose of the vessel and 2) at least 12-hour notice of intent to dispose of the vessel.

We will get the approval letter to Mr. Tvenge once it is ready for issuance. Please note that the scuttling is not approved until EPA's approval letter has been issued. EPA will strive to release the letter by the end of next week.

Please feel free to contact me with any questions or concerns.

Thank you for your patience,
Betsy
