At the DOH EOY in Dec. 07, an action item was flagged about the prospect of including a provision in the renewed UIC permit for Lahaina WRF regarding potential impacts from the discharge on near coastal surface waters. I had hoped to respond to this issue, at least internally, with the release of a draft of the UIC permit. Due to various circumstances, that has not occurred and I am now responding to the action item in preparation for the week of May 12. Below is the response I am providing. If anyone wishes to have a discussion about this matter, please let me know. We should have a draft of the permit ready in the coming weeks, although perhaps not in time to share it with DOH when they are here.

David

5. EPA will investigate whether the pending reissuance of the Lahaina federal UIC permit should include provisions requiring the investigation of possible impacts from the discharge on surface waters. Deliberative [redacted]
