unreasonably forcing me (the American Public) to do your job.

1. I have fracking material in my well. this is man made fracking material consisting of Barium and other materials which vary from fracking company to fracking company (their trade secret mix). I also have fracking debre from them grinding or drilling into the mountain flushing the debre with coliform poluted water and then the whole mess blown with extreme pressure into my well. this mixture in the mountain at my house consists of every toxic mineral and poison on the periotic chart from Arsenic, Cyanide, mercury, Lead, uranium of various forms numerous toxic poisons + minerals. In short they made toxic soup of the first order, they totally destroyed my water well, Levels of polution in my well have elevated even though they aren't opperation the well. Trying to filter this toxic is not reasonable I must have a settlement so I can relocate.

2. In order for legally admissible evidence in court I have to do this.

A. Have well man pull my pump to collect soil sample (that is man made frack substance and frack debre) that will hopefully still be on supply line or new well pump. Remember this happened 3 years ago. If I knew then what I know now I never would have replaced my well pump. I would then have a slam dunk! but I did replace it and after all this time I have to hope I can somehow collect the soil sample.

B. I have to at the same time have my water test company representative here to collect the water sample and the soil sample because I can't collect the samples in order to be admissible in court.

C. Providing I can get well man + water testing representative here at same time and samples are available and collected I will then use my phone to take pictures and send pictures to you and media and others to prove what I have been telling every body is real as to what happened to my well.

I hope you now understand how unreasonable it is to force American citizens into this situation. After all we are already victums here. To say the least! Anyway this is what I will attempt to do. Please let me know

→

If you decide to do your job. my well man I talked to on Tuesday (4/1/14) and he has just started drilling a well for a customer and I don't know when he will be finished with that job. He told me he will help me out pulling the well pump no matter how many times we need to pull it. (for however many people)

I have not talked to water test company to see what their schedule looks like. I decided to use mountain Resources. They have an office in Dubois & Altoona, their representative came from Dubois last time to collect sample. that's about 45 minutes from my house.

I will let you know how I make out coordinating all this. or just look for a picture to show up on your smart phone.

Of cource if you decide to do your job please Let me know. My new phone number the hopefully untapped one is

[redacted]

thanks

Donald R. Ludwig
