I sent a note (brief one) to Dirty Bryan Oram telling him basically I'm on to him and his scam. Look this guy has been lying under oath in courtrooms involving settlements in fracking polution cases involving large sums of money. I sent him a note telling him I'm on to him. Have his phone tapped and see who he contacts. what he has been doing has got to be serious jail time.

Mike when he came to the conclusion that it was my well pump that caused the extreme pressure that blew up my plumbing he was already in possession of information that I sent him that his conclusion was not possible. I'm telling you this guy is dirty.

you must investigate him. After all I walked right into their trap because of the guy you contacted in State College Extension Coop Bryan Swistock. I didn't trust water testing companys I used and he suggested to me National testing Labs in Ohio.

Remember my water tests done in 2010 by Mountain Resources in Altoona, went missing from their computers over the Holidays. I called them befor Holidays to have them E-mail a copy to you. They called me twice asking me for help to find their copy's on their computer because they could not find it.

I called them after New years to see if they finally found & e-mailed copy to you. they said they did and I later talked to you and you told me you got it. But you had not looked at it. you seemed mad

that is why I called National testing lab in Ohio. my thinking was to try out of state testing company to be safer. It was National Testing Lab who gave me Bryan Oram's number. They told me he was sympathetic to fracking polution

I don't know how extensive this scam is but it needs investigating. I was set up. this guy has all my tests and information to twist

... with his expert testimony.

I continue to tell you all the concrete proof of what happened to my well is in my well and you just need to inspect it. I believe, but I can't be certain, but there is a good chance the bottom 20 feet or so of my well is their fracking mixture and their fracking debre.

My well pump was completely covered with the stuff and the supply line had the Barium here & there every couple feet or so another 20 ft above the pump.

this stuff has got to be as good as a finger print, their (trade secret)

Remember I told you time & again my well man said he never saw that stuff befor on my well pump!

out of 10's of thousands of wells he has drilled and worked on here in Centre County.

you can not ignor this!

What more concrete proof could you need! investigate Dirty Bryan Oram. Lying under oath in Large Sum settlement cases can't be ignored!

thank Mike,

Donald R. Ludwig

PS/ I sent him note same day I mailed these letters to you. time probably matters to catch him!

SS/ I'm tight with president now!

BK maybe I stretched it a bit but Oram is dirty!
