AG4 Mr. President
EPA

This is the third letter I have written to you regarding the blowing up and polution of my water well by a fracking opperation next to my property.

I have given up on any help from the Pa. D.E.P. they are completely corrupt and are literally killing American Citizens who have their water poluted only to find the D.E.P. doing nothing deliberately. In time, they, and whoever gave them their orders to ignore fracking polution of public water wells will be prosecuted. But as for now my only hope is the Federal E.P.A. and you sir.

the E.P.A. in Philidelphia and specifically Mike Eller who I'm communicating with now for over 4 months continue to pass the buck and do nothing.

I have told him numerious times about my fracking muck covered well pump that my well man has told me he has never seen befor on a well pump, but he ignores me. I'm the only citizen with that fracking muck on their well pump in Central Pennsylvania in history. yet he ignores this. My well man has drilled and serviced thousands of wells in Central Pa. and he tells me he has never seen that muck befor. Concrete Proof is completely ignored!

the water in my house that was excellent for 19 years is now toxic with lead and God only knows what else and my property is now unsaleable and worthless and I'm getting no help from anyone.

Sir, I need your help to get basic justice. thats' all I'm asking for. I now have lead poison from drinking & showering in my water.

Help!
