Thanks, Rebecca. That sounds fairly straightforward.

Three people on my team will need to see the images to complete our evaluation. If it is ok with you, I will share their e-mail addresses and you can send the file to all 3 of us at once. If you want, I will convey the password to them or give you their phone numbers if you prefer to do that yourself.

I can be reached at 703.247.6159. I should be off the phone until 4:30 ET (or you can leave a message).

Calvin and Kate: please let me know if you have any additional needs.

Subject: [EXT] RE: CBI in CES-Mendota permit application

Hi Shari,

Its nice to "meet you," and thank you for reaching out.

As a quick background, our Class VI permit application was developed for EPA using templates provided on EPA sites. Our Pre-Construction application for the Mendota site was submitted via the GS Data Tool in February and includes a project Narrative and nine (9) supporting attachments. Only the Narrative contains Confidential Business Information (CBI). The CBI is contained in approx. ten figures throughout the document – all clearly marked as CBI.

So, my plan is to send you directly the Narrative with CBI file only, as the other attachments do not contain CBI and can shared more readily.

Typically, when we share a confidential file via email, we send it as an encrypted file. I would then call you with the password needed to open/unlock the document. If this method is acceptable, I should be able to send the file this afternoon. Also, please confirm the phone number I should call to reach you.

Thanks again and please don't hesitate to reach out with any questions.

Best Regards,
-Rebecca

Hello Rebecca,

I am writing to let you know that Cadmus has received approval from EPA to receive and review the confidential business information in your Class VI permit application.

Calvin asked me to reach out directly to you to work out the logistics of receiving the information. Please let me know what information you need from me or if you would like to discuss the best approach.

I'm happy to talk if that makes things easier.

I hope you're doing well.
