Thank you both for looking into this. Much appreciated.

Please let me know if I can be of assistance in any way.

Happy Friday,
-Rebecca

>> In assisting Clean Energy Systems prepare the Pre-construction Class VI application we are using some well log data and seismic data under license from data brokers, such as IHS. The license agreements specify that we are not allowed to show data or derivatives to third parties via Internet. We are explaining the application process to the data

brokers and I think it would be helpful for us to be able to convey if the images, tables and figures that are included in the narrative and various attachments are public documents, if they can be kept confidential and what needs to be done to be in compliance with the license terms. Would it be possible to have a call with you or someone on your team to provide some clarity on this question?

Regards,
Wayne
