Hey Ravi,

Hope your Thanksgiving was great. Like Dan and I discussed with you on the November 15th at our EW meeting we are submitting our SAP for the T25 Habitat project for EPA review (attached). Also as mentioned, we have a very tight window to complete the upland drilling (before Christmas) since portions of T25 are leased by the contractor demolishing the viaduct. They will be mobilizing and preparing the site in in late December/early January and will be there for a minimum of 18-24 months. Please let me know if we can set of a time next week to discuss this SAP. Also let me know if there is any else we can do to help expedite this review. Thanks
